---

Hi Mike,

Thanks again for your time today on the phone. As discussed, attached please find the recent EPA letter to the SJVAPCD ("...0930.pdf").

Also attached are the SJVAPCD's response, the EPA's confirmation (both "...1007..."), and an example of the Final ATCs (prohibiting construction until a Title 5 permit is received. The other 3 were worded identically.)

We share your hope that the EPA is helping to move this to some sort of actionable clarity.

Two other follow ups:

1) When you talk to EPA, can you support the concept that they fund a review of source testing for this category? This may take a while (and even more if it is determined that new method(s) need validating), but it would be good to get it started. In the meantime, we can use mass balance, but a solid assessment of actual emissions factors and inventory is long overdue.

2) Do you have any examples of standard vendor guarantees you can share?

Thanks and best regards!,

-PT
