

air pollution control district
SANTA BARBARA COUNTY

MEMORANDUM

DATE: April 18, 2022

TO: Community Advisory Council (CAC) Members

FROM: Jim Fredrickson, (805) 979-8328, FredricksonJ@sbcapcd.org

SUBJECT: April 27 CAC Meeting to Introduce the 2022 Ozone Plan

Every three years, the District is required to update our plan to attain and maintain the state 1-hour and 8-hour ozone standards. The 2022 Ozone Plan (2022 Plan) will be the tenth triennial update to the initial state Air Quality Attainment Plan adopted by the Santa Barbara County Air Pollution Control District (District) Board of Directors in 1991. The 2022 Plan will be composed of seven chapters that address air quality trends, the emission inventory, stationary source control measures, transportation control measures, voluntary incentive programs, and the attainment strategy.

District staff will introduce the framework for the 2022 Plan at the April 27, 2022 Community Advisory Council meeting. Staff will also provide a brief history of our planning efforts and discuss the process and schedule for developing and updating the plan. This agenda item will be informational only (i.e., no formal CAC recommendation will be sought).

District staff plans to hold at least two more CAC meetings to review and discuss the 2022 Plan, tentatively scheduled for June and August. After receiving input from the CAC, staff intends to take the 2022 Plan to the District Board for a public hearing and adoption.

To review the contents of the previously adopted 2019 Ozone Plan, please visit www.ourair.org/planning-clean-air. If there are questions or concerns that you would like to discuss prior to the meeting, please contact me at (805) 979-8328 / e-mail: FredricksonJ@sbcapcd.org
