INTRODUCTORY SECTION

LETTER OF TRANSMITTAL

January 8, 2021

To the Governing Board of the Santa Barbara County Air Pollution Control District, and
the Citizens of Santa Barbara County

Please accept the Comprehensive Annual Financial Report (CAFR) of the Santa Barbara County Air Pollution Control District (the District) for the fiscal year that ended June 30, 2020.

District management assumes full responsibility for the accuracy of the data, the completeness and fairness of the presentation, including all disclosures. To the best of our knowledge and belief, the enclosed data is accurate in all material respects, reported in a manner designed to present fairly the financial position and results of operations of the various funds and all disclosures necessary to enable the reader to gain an understanding of the District's financial activities.

Bartlett, Pringle & Wolf, LLP, a firm of licensed certified public accountants, has issued an unmodified ("clean") opinion on the District's financial statements for the fiscal year ended June 30, 2020. The independent auditors' report is presented as the first component of the financial section of this report.

Management's discussion and analysis (MD&A) immediately follows the independent auditors' report and provides a narrative introduction, overview, and analysis of the financial statements. MD&A complements this letter of transmittal and should be read in conjunction with it.

A federally mandated "Single Audit" was not required for the fiscal year ended June 30, 2020 because expenditures of federal funds were less than the \$750,000 threshold. Therefore, there will not be a separately issued Single Audit report.

Profile of the Santa Barbara County Air Pollution Control District

The District is an independent special district charged with improving the quality of the air, and protecting the people of Santa Barbara County from the effects of air pollution. In 1970, the California Legislature gave local governments the primary responsibility for controlling air pollution from most sources except motor vehicles. In response, the District was established on September 14, 1970 to adopt measures to control stationary sources of pollution, issue permits, monitor air quality, maintain an inventory of pollution sources, and other related activities.

Aeron Arlin Genet • Air Pollution Control Officer

SANTA BARBARA COUNTY AIR POLLUTION CONTROL DISTRICT GOVERNING BOARD

Policymaking and legislative authority is vested in the governing board (Board) of the District, which consists of the five members of the County Board of Supervisors and one representative (a mayor or city councilperson) from each of the eight cities in the county, totaling thirteen (13). The Board is responsible, among other things, for adopting rules and regulations, adopting budgets, appointing committees, and appointing the Air Pollution Control Officer (APCO).

The following lists members of the governing board as of June 30, 2020.

Supervisor Das Williams, Chair

First District

Santa Barbara County Board of Supervisors

Mayor Holly Sierra

Alternate – Councilmember Ed Andrisek

City of Buellton

Supervisor Gregg Hart

Second District

Santa Barbara County Board of Supervisors

Vice Mayor Al Clark

Alternate – Mayor Wade Nomura

City of Carpinteria

Supervisor Joan Hartmann

Third District

Santa Barbara County Board of Supervisors

Mayor Paula Perotte, Vice-Chair

Alternate – Councilmember Stuart Kasdin

City of Goleta

Supervisor Peter Adam

Fourth District

Santa Barbara County Board of Supervisors

Mayor Pro Tem Gina Rubalcaba

Alternate – Mayor Ariston Julian

City of Guadalupe

Supervisor Steve Lavagnino

Fifth District

Santa Barbara County Board of Supervisors

Councilmember James Mosby

Alternate – Mayor Jenelle Osborne

City of Lompoc

Mayor Cathy Murillo

Alternate – Councilmember Eric Friedman

City of Santa Barbara

Mayor Alice Patino

Alternate – Councilmember Etta Waterfield

City of Santa Maria

Mayor Ryan Toussaint

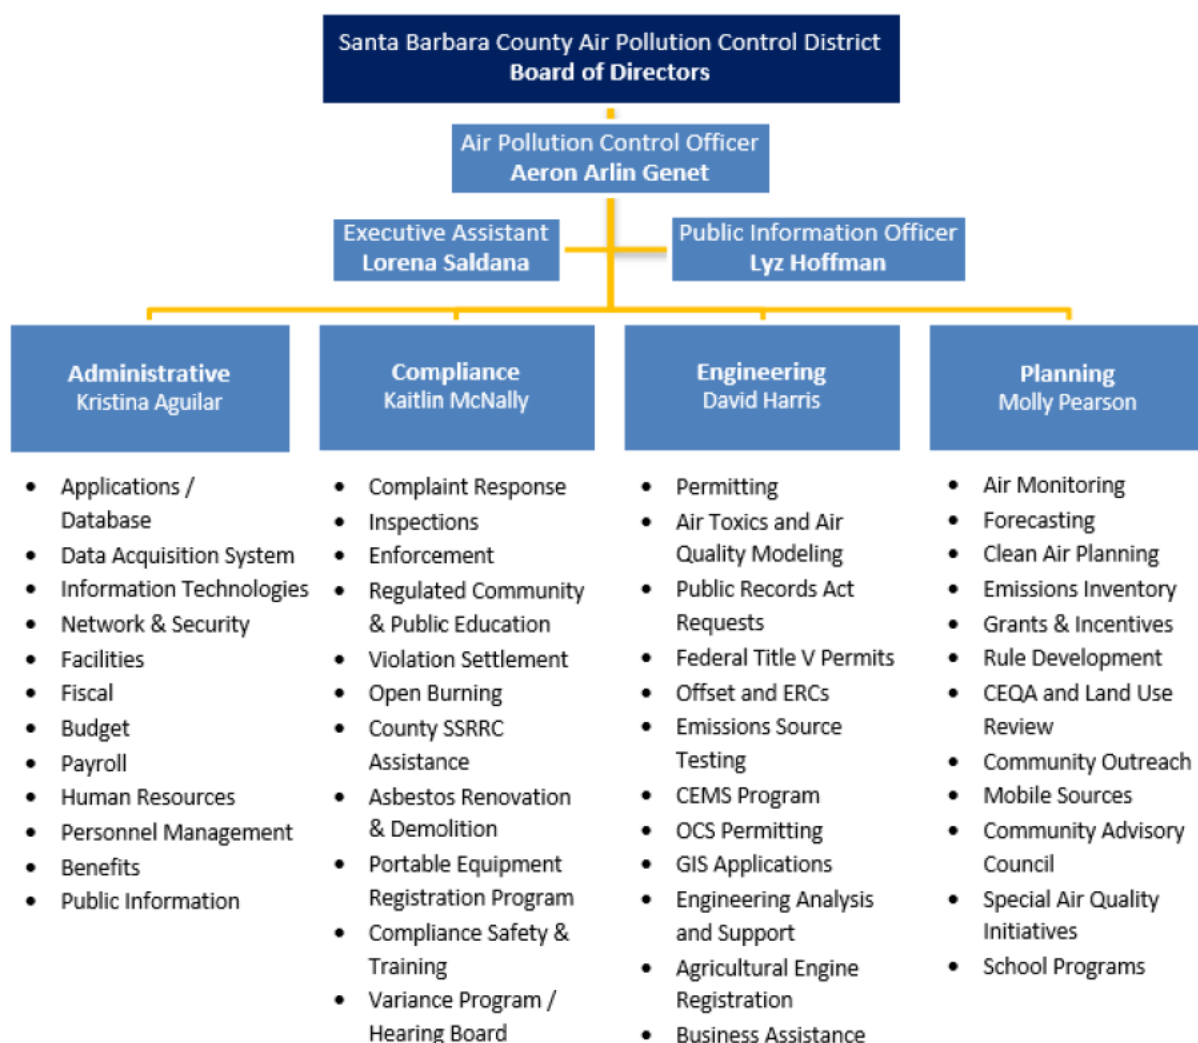

Alternate, Councilmember Daniel Johnson

City of Solvang

ORGANIZATION CHART

The District, with 36.00 full-time equivalent employees, has expertise in meteorology, engineering, chemistry, planning, environmental sciences, industrial field inspection, air monitoring, public outreach, data processing, accounting, human resources, and administration.

The following chart lists the Air Pollution Control Officer and the primary divisions as of June 30, 2020.

WHAT WE DO

Our activities are guided by broad priorities, upon which narrower goals are developed, along with specific objectives (activities) to achieve those goals. The District priorities, goals, and objectives are as follows:

Priority 1: Protection of Public Health Through Air Quality Improvement

Goal: Continue to implement programs which directly reduce emissions.

Objectives:

- Adopt new rules and regulations which cost-effectively reduce emissions.
- Emphasize alternatives to “command-and-control” regulations such as pollution prevention, incentives, and social responsibility.
- Develop partnership initiatives to introduce innovative or other low polluting technology in areas not currently regulated or where technology recipients agree to go beyond regulatory requirements.
- Involve the community in pollution reduction efforts through grant programs, public education, and recognition of outstanding pollution reduction efforts.
- Maintain a fair and consistent compliance program, with emphasis on educating the regulated community.
- Ensure a contribution by all emission sources toward emission reductions.
- Use penalties to act as a deterrent and to place emphasis on compliance.

Goal: Maintain a strong, science-based program.

Objectives:

- Place a high priority on staff training and professional advancement.
- Base decisions on well-documented data that has been subject to critical and open review.
- Maintain a sound and ever-improving emission inventory and air quality monitoring system.
- Maintain and update the Ozone Plan using the latest data and control techniques.
- Use the best available resources in developing programs, rules, and permit analyses.

Goal: Ensure that the District’s mission and actions are aligned and routinely reviewed.

Objectives:

- Maintain and periodically update a strategic plan.
- Develop and adopt annual goals and track progress.

The District’s mission is to protect the people and the environment of Santa Barbara County from the effects of air pollution.

Goal: Ensure adequacy of resources.

Objectives:

- Continue to streamline and improve efficiency by taking advantage of technological advances and continuously reviewing systems and reviewing tasks for process improvements.
- Broaden the District funding base by actively pursuing additional sources of revenue.
- Continue to review our financial status by developing new tracking mechanisms to ensure financial stability.

Priority 2: Community Involvement

Goal: Involve the community in air quality protection.

Objectives:

- Initiate collaborative efforts and partnerships with the community around shared air quality and environmental goals.
- Offer timely information on air quality issues and upcoming events via the District's website and social media.
- Provide the public with additional informational resources, including presentations and publications.
- Support the District Community Advisory Council to provide input on rules and clean air plans and to foster open communication and a collaborative approach to air pollution control planning.
- Conduct workshops on new rules, plans, and the budget to obtain community input.
- Reach out to community partners and the media for additional opportunities to inform the public.
- Participate in community events
- Support students and teachers in efforts to learn about air quality and the environment.

Priority 3: Continuously Improve Service

Goal: Maintain and improve relationships with all constituents.

Objectives:

- Keep the Board well informed.
- Provide opportunities for public input to decisions which affect them.
- Train staff in customer service and reward good service.
- Survey constituents regarding the quality of service received.
- Tap employee expertise, reward high performance, and push decisions down to the lowest level at which they can be competently made.

DIVISION RESPONSIBILITIES

Engineering Division staff: issues permits, and works with businesses to help them comply with permits; implements the federal Title V program for large sources of air pollution; and implements the State's air toxics "Hot Spots" program for sources of toxic air pollution.

Compliance Division staff: provides initial and ongoing inspection and enforcement services to applicants and operators of stationary sources of air pollution. Perform random surveillance activities; reply to public nuisance complaints regarding odors, smoke and dust; implement the federal Asbestos program; inspect equipment under the Statewide Portable Equipment Registration Program (PERP); inspect our local agricultural engine registrations; and in coordination with Santa Barbara County Fire, implement our burn programs (e.g., agricultural burns, prescribed burns).

Planning Division staff: oversees the District's air monitoring network, in addition to providing planning and rule development and coordinating with planning departments around the country. Conducts outreach, including grant programs to promote clean technologies, presentations to schools and community groups, and partners with local agencies and organizations. Reviews discretionary actions by the County and cities, provides comments on air quality issues, and is responsible for ensuring compliance with the California Environmental Quality Act (CEQA). Grants administered by the Division include incentives for replacing higher-emitting cars, school buses, off-road equipment, and marine diesel engines with newer, cleaner engines. In addition, the Planning Division initiates and supports collaborative efforts to reduce emissions from unregulated sources, such as programs to reduce emissions from marine shipping (Protecting Blue Whales and Blue Skies) or tourists' vehicles (Santa Barbara Car Free). The Division is implementing the legislative requirements and incentive programs associated with the state's AB 617 program and is responsible for overseeing the District's air monitoring network.

The Administrative division includes administrative overhead, fiscal and executive services, human resources, and information technology section.

OUR AIR QUALITY

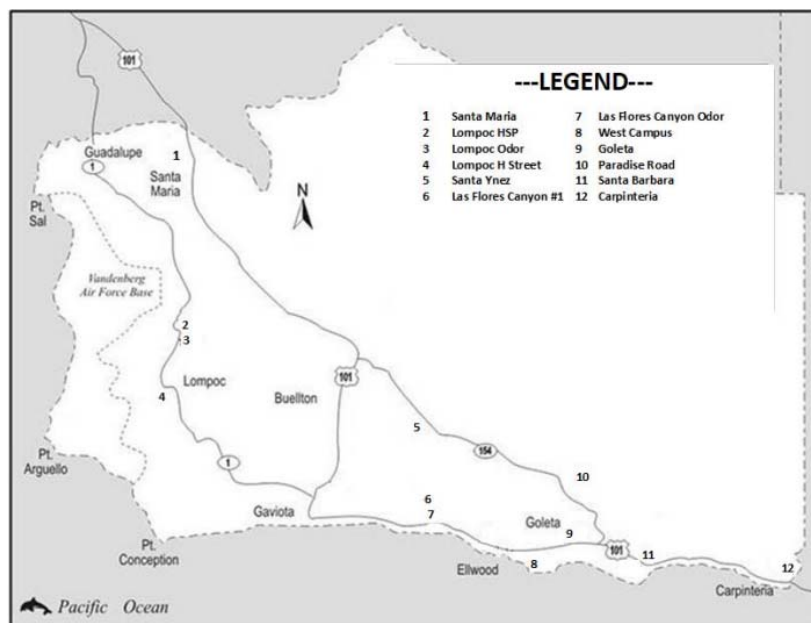

The state and federal governments have established ambient air quality standards for several air pollutants. The standards tell us how much of each pollutant can be in the air without causing harm to human health. The District is required to monitor air pollution levels to ensure these standards are met, and if they are not, to develop a strategy to reduce air pollution so they can be met. The map, below, shows the locations of air monitoring stations in Santa Barbara County.

Santa Barbara County's air quality has historically violated both the state and federal ozone standards. Ozone concentrations above these standards adversely affect public health, diminish the production and quality of many agricultural crops, reduce visibility, and damage native and ornamental vegetation.

In 1970, when the District was formed, the air in Santa Barbara did not meet the federal one-hour ozone standard. For 30 years, our efforts focused on attaining that standard. On August 8, 2003, Santa Barbara County was officially designated an attainment area for the federal one-hour ozone standard. Furthermore, United States Environmental Protection Agency (USEPA) has designated Santa Barbara County as “attainment” for the federal eight-hour ozone standard (0.075 parts per million). The eight-hour standard replaced the previous federal one-hour standard. In addition, we attained the state one-hour ozone standard for the first time during 2004-2006. On December 28, 2015, the US EPA strengthened the federal eight-hour ozone standard to 0.070 ppm; Santa Barbara County was designated unclassifiable/attainment for the 2015 revised standard on April 30, 2018.

The California eight-hour ozone standard was implemented in June 2006. The County violates the state eight-hour ozone standard and the state standards for PM₁₀ (particulate matter of 10 micrometers or less). The number of ozone exceedance days has decreased while population has increased. Because the number of ozone exceedance days has decreased and the County is getting closer to meeting the California eight-hour standard, the attainment status for this standard has changed from nonattainment to nonattainment-transitional in April 2017.

MAP OF SANTA BARBARA COUNTY'S 12 AIR QUALITY MONITORING STATIONS

FACTORS AFFECTING THE FINANCIAL CONDITION

Major Initiatives

The APCO, in the District's adopted budget, outlines major programs (initiatives), accomplishments, and goals aligned with the Strategic Plan as adopted by the District Board. This budget is available at <http://www.ourair.org/apcd/our-budget/>.

One-Time Pass-Through Grant Fund Revenues - The state Legislature, through the budget adoption process, continues to place a strong emphasis on the use of funding for voluntary emission reduction programs through the network of local air districts. This action resulted in a total of over \$2.7 million for Santa Barbara County projects in FY 2019-20, a 21.1% increase in grant funds received in the current year. These funds will be used to continue expanding the reach of the grant programs that were initiated in FY 2018-19, including the Carl Moyer, Community Air Protection, FARMER, and Wood Smoke Reduction programs. These one-time revenue sources will provide \$308,573 in administrative funds to implement the grant programs.

Clean Air Fund Program - With our newly created Clean Air Fund Program, the District has earmarked \$100,000 of excess Notice of Violation funds from FY 2018-19 to allow the District to implement projects that do not meet the traditional grant program guidelines as defined by the state. In this year's budget, the District is developing a voluntary incentive program to replace gas-powered landscape equipment with zero emission technologies.

One-Time Expenditures included in this year's budget - For FY 2019-20, the District budget includes four large one-time projects. The first one-time budget item is associated with expanding agency awareness to better serve the community, including increased efforts to expand on the underserved individuals in the county. Upgrades of our website will enable the District to more efficiently gather information from permit holders using online forms, respond to public complaints, and provide real-time air quality information in a user-friendly fashion. The development of an Air Quality Emergency Response Plan will ensure that District resources are aligned and prepared to respond during unexpected air quality events. Additionally, the District is taking over ownership of two CARB monitoring sites, additional equipment is budgeted to bring those stations up to the District's normal operating specifications. Lastly, the District spent funds in order to reconfigure the office space as a result of a future reduction in leased space in Santa Barbara.

Revenue Summary

The District is financed primarily through fees paid by regulated businesses, motor vehicle registration fees, and federal and state grants.

The Strategic Plan forecasted that overall fee revenue would decrease substantially for several years, and indeed, sizable revenue reductions occurred shortly after they were predicted.

Detailed charts of fee and expenditure trends along with other demographic information can be found in the statistical section of this report.

The fee revenue outlook has stabilized and while it is predicted revenues will grow, it is predicted that they will grow less than the CPI. The lag behind the CPI is due to positive emission reductions from new, cleaner, emission sources replacing the periodic withdrawal of older, less efficient sources.

The District has not proposed an increase in fees on regulated sources since 1991 other than the annual adjustment for CPI change pursuant to its rules, which, for FY year 2019-20 was 3.6% resulting in no change in the fee base.

Detailed charts of fee and expenditure trends along with other demographic information can be found in the statistical section of this report.

Internal Accounting Control Policy

District management is responsible for establishing, maintaining and evaluating the District's accounting system with an emphasis on the adequacy of an internal control structure. The internal accounting controls are designed to ensure that the assets of the government are protected against loss, theft or misuse; to ensure the reliability of adequate accounting data for the preparation of financial statements in conformity with Generally Accepted Accounting Principles (GAAP); and, to provide reasonable, rather than absolute, assurance that these objectives are met. The concept of reasonable assurance recognizes that the costs of control should not exceed the benefits likely to be derived from it and that the evaluation of costs and benefits require estimates and judgment be made by management.

The District's internal control evaluations occur within the above framework which ensures adequate safeguard of the District's assets and reasonable assurance of proper recording of financial transactions.

Budgetary Policy

The District maintains budgetary controls through both signature authority and automated budget checking. The objective of these controls is to ensure compliance with the annual appropriated budget approved by the Board. The accounting principles applied in developing budgetary expenditures match GAAP and the amounts reported on the financial statements. As reflected in the statements and schedules included in the financial section of this report, the District continues to meet its responsibility for sound financial management.

LONG-TERM FINANCIAL PLANNING

The highest hurdle to the District's long-term financial success is surviving the ups and downs of the economy. If any large regulated sources close their doors because of a downturn in the economy, it could cause a financial burden to the District due to a reduced revenue stream.

RELEVANT FINANCIAL POLICIES

Cash Management

The County of Santa Barbara provides treasury management services to the District. Cash resources of the District are invested as part of Santa Barbara County's Pooled Investment Portfolio. The County investment policy authorizes investments in United States treasury bills, bonds and notes, obligations issued by agencies of the United States Government, bankers acceptances, commercial paper, medium term notes, certificates of deposit, and the State's Local Agency Investment Fund. The fair market value of District's portfolio at June 30, 2020 is \$9,981,786 (see Note III of the basic financial statements).

Risk Management

The District manages its risks of property and liability losses through commercial insurance. Commercial insurance coverages are obtained with assistance from a brokerage firm, Alliant Insurance Services, Inc. The District maintains all risk property coverage with replacement cost valuation for pooled insurable values of approximately \$1,000,000,000 with a deductible of \$10,000.

Loss control activities are managed by the District's staff assigned to risk management activities. Staff performs loss prevention inspections and employee safety training to minimize potential human and property losses, and establish compliance with Cal/OSHA regulations.

Acknowledgments

The preparation of this CAFR is the result of a coordinated effort by the entire District staff. We would like to acknowledge the special efforts of the Fiscal Section and our independent auditors, Bartlett, Pringle & Wolf, LLP.

Recognition is also given to the Board for its leadership and support and to all employees of the District who continue to embrace innovation and improve operations to accomplish the District mission of protecting public health.

Respectfully Submitted,

Aeron Arlin Genet
Air Pollution Control Officer

Kristina Aguilar
Administrative Division Manager

INDEPENDENT AUDITORS REPORT

BARTLETT, PRINGLE & WOLF, LLP
CERTIFIED PUBLIC ACCOUNTANTS AND CONSULTANTS

INDEPENDENT AUDITOR'S REPORT

To the Board of Directors of
Santa Barbara County Air Pollution Control District:

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities and the major fund of the Santa Barbara County Air Pollution Control District (The District) as of and for the year ended June 30, 2020, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

1123 CHAPALA STREET • SANTA BARBARA, CA 93101 • TEL: (805) 963-7811 • FAX: (805) 564-2103 • WWW.BPW.COM

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities and the major fund of the Santa Barbara County Air Pollution Control District as of June 30, 2020, and the respective changes in financial position, and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis on pages 20 through 31, the General Fund - Budgetary Comparison Schedule on pages 64 and 65, the Santa Barbara County Employees' Retirement System Schedule of the District's Proportionate Share of the Net Pension Liability on page 66, the Santa Barbara County Employees' Retirement System Schedule of the District's Pension Contributions on page 66, and the Santa Barbara County Employees' Retirement System Schedule of the District's Changes in the Net OPEB Asset (Liability) and Related Ratios on page 67 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the District's basic financial statements. The introductory section and statistical sections are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The introductory section and statistical section have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated January 8, 2021 on our consideration of the District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters.

The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the District's internal control over financial reporting or on compliance.

That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the District's internal control over financial reporting and compliance.

Santa Barbara, California

MANAGEMENT'S DISCUSSION AND ANALYSIS

(Unaudited) As of June 30, 2020

The information in this section is not covered by the Independent Auditors' report, but is presented as required supplementary information for the benefit of the readers of the comprehensive annual financial report (CAFR).

As management of the Air Pollution Control District of the County of Santa Barbara, California (the District), we offer readers of the District's financial statements this narrative overview and analysis of the financial activities of the District for the fiscal year (FY) ended June 30, 2020. We encourage readers to consider the information presented here in conjunction with additional information that we have furnished in the District's basic financial statements, which immediately follow this section.

FINANCIAL HIGHLIGHTS

New Significant Accounting Standards Implemented

For the year ended June 30, 2020, the District implemented the following Governmental Accounting Standards Board (GASB) Pronouncement:

Statement No. 95: *Postponement of the Effective Dates of Certain Authoritative Guidance* was implemented to provide temporary relief to governments and other stakeholders in light of the COVID-19 pandemic. This was accomplished by postponing pronouncement dates. The adoption of this standard did not have a material impact on the District.

Future Governmental Accounting Standards Board (GASB) Statement

The Governmental Accounting Standards Board Statements listed below will be implemented in future financial statements. These statements will be evaluated by the District to determine if they will have a material impact to the financial statements once effective.

Statement No. 87	"Leases"	The requirements of this statement are effective for fiscal years beginning after June 15, 2021. (FY 21/22)
Implementation Guide 2019-3	"Leases"	The requirements of this implementation guide are effective for fiscal years beginning after June 15, 2021. (FY 21/22)
Statement No. 92	"Omnibus 2020"	The requirements of this statement are effective for fiscal years beginning after June 15, 2021. (FY 21/22)

Government-wide Financial Analysis

The assets of the District exceeded its liabilities at the close of the most recent fiscal year by \$670,495 (*net position*):

- \$706,601 represents the District's investment in capital assets, less any related outstanding debt used to acquire those assets (*invested in capital assets, net of related debt*).
- (\$36,601) represents (*unrestricted*) net position, which may be used to finance the District's day-to-day operations without constraints established by legal requirements.
- The District's total net position decreased by (\$340,776) (or 33.7%) over the prior year:
- A \$155,169 increase in net position invested in capital assets, net of related debt, represents capital purchases less depreciation plus the retirement of any related long-term debt. See further discussion of capital assets on page 24.
- A \$495,945 decrease in unrestricted net position is the change in resources available to fund District programs and obligations.

Financial Analysis of the District's General Fund

As of the close of the fiscal year, the District's governmental funds reported combined fund balances of \$9,690,668. This amount represents entirely the amount of the General Fund and an increase of 1.58%, or \$151,144 from the prior year. Of that amount, approximately 99.9% or \$9,676,182 is available for spending, but bound by various levels of constraints that control the purposes for which specific amounts can be spent.

Capital Assets and Debt Administration

The District's investment in capital assets (net of accumulated depreciation) increased \$115,169 (or 28.1%) to \$706,601. During the fiscal year, the District purchased seven pieces of equipment, one piece of software, and was in the process of implementing an office renovation, reflected in construction-in-process. The District disposed of one vehicle and fully-depreciated furniture in conjunction with the office renovation. The District recorded depreciation of \$194,081 against its assets. No long-term debt currently exists related to capital assets.

OVERVIEW OF THE BASIC FINANCIAL STATEMENTS

This discussion and analysis is intended to serve as an introduction to the District's basic financial statements. The District's basic financial statements have two components:

- 1) Combined Government-wide and Fund Financial Statements, with GASB 34 adjustments
- 2) Notes to the Basic Financial Statements.

Government-wide Financial Statements

The government-wide financial statements are designed to provide a broad overview of the District's finances, in a manner similar to commercial enterprises or a private-sector business.

The *Statement of Net Position* reports all assets held and liabilities owed by the District on a full accrual basis. The difference between the two is reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the District is improving or deteriorating.

The *Statement of Activities* reports the most recent fiscal year changes to the District's net position, also on a full accrual basis. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows.

The focus of the Statement of Activities is on the cost of various work program activities performed by the District. As a single purpose entity the statement begins, and only contains, a single column that identifies the activities of the District and can be called general revenues and expenditures. Revenues are provided before the costs that are then netted against them. The difference between the expenses and the revenues represents the draw from, or contribution to net position.

The District's government-wide financial statements are presented on pages 32 and 34, and combined with the fund financial statements.

Fund Financial Statements

Unlike government-wide financial statements, the focus of fund financial statements is directed to specific activities of the District rather than the District as a whole. A fund is a grouping of related accounts used to maintain control over resources segregated for specific activities or objectives. As a single purpose entity, the District only utilizes governmental funds to account for its activities.

Governmental Funds

Governmental funds account for essentially the same functions reported as *governmental activities* in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on *near-term inflows and outflows of spendable resources*, as well as on *balances of spendable resources* available at the end of the fiscal year. Such information is useful in evaluating the District's near-term financing requirements. The governmental funds' focus is narrower than that of the government-wide financial statements. To understand the long-term impact of the District's near-term financing decisions, it is useful to compare the information presented for *governmental funds* with similar information presented for *governmental activities* in the government-wide financial statements.

Governmental Funds (Continued)

The reconciliations of the governmental funds balance sheet and the governmental funds statement of revenues, expenditures, and changes in fund balances to the government-wide financial statements facilitate the comparison between *governmental funds* and *governmental activities*.

Pages 32 and 34 of this report display the governmental funds financial statements.

The reconciliation between the *total fund balances* can be found on page 33 and the reconciliation of the *total change in fund balances* for all governmental funds to the *change in net position* can be found on page 35.

The District adopts an annual appropriated budget for its operating fund. The budget and actual comparison statement provided for the General Fund, found on page 64 under the *required supplementary information* section, demonstrates performance against the budget.

Notes to the Basic Financial Statements

The notes to the basic financial statements, starting on page 36, provide additional information that is essential to the full understanding of the data provided in the government-wide and fund financial statements.

GOVERNMENT-WIDE FINANCIAL ANALYSIS

As noted earlier, net position may serve over time as a useful indicator of the District's financial position. At the close of the most recent fiscal year, the District's total assets of \$11,872,449 and deferred outflows of \$4,543,010 which was more than the total of liabilities of \$13,480,972 and deferred inflows of \$2,263,992 by \$670,495.

Analysis of Net Position

The District's total net position decreased by (\$340,776), or (33.7%), during the fiscal year. As described below, the District experienced an increase in the invested in capital assets, net of related debt category, while also experiencing an decrease in the unrestricted category.

Information in the Management's Discussion and Analysis section is not covered by the Independent Auditors' report, but is presented as required supplementary information for the benefit of the readers of the comprehensive annual financial report (CAFR).

A summary of net position is as follows:

SUMMARY OF NET POSITION

	Governmental Activities		Changes	
	June 30, 2020	June 30, 2019	Dollar	Percent
Current and other assets	\$ 11,165,848	\$ 10,442,196	\$ 723,652	6.9%
Capital assets	706,601	551,432	155,169	28.1%
Total assets	11,872,449	10,993,628	878,821	8.0%
Deferred outflows of resources	4,543,010	3,864,409	678,601	17.6%
Current and other liabilities	13,480,972	11,799,817	1,681,155	14.2%
Total liabilities	13,480,972	11,799,817	1,681,155	14.2%
Deferred inflows of resources	2,263,992	2,046,949	217,043	10.6%
Net Position:				
Invested in capital assets, net of related debt	706,601	551,432	155,169	28.1%
Unrestricted	(36,106)	459,839	(495,945)	-107.9%
Total net position	\$ 670,495	\$ 1,011,271	\$ (340,776)	33.7%

The components of total net position are as follows:

Invested in Capital Assets, Net of Related Debt

Invested in capital assets (e.g. furniture, vehicles, machinery, and equipment), less outstanding debt used to acquire those assets, equals the District's investment in capital assets (net of accumulated depreciation) at June 30, 2020 and comprises \$706,601 of the District's net position. No debt is outstanding. The District uses these capital assets in carrying out its mission of protecting public health. Consequently, these assets are not available for future spending. Although the District's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay any debt must be provided from other sources since the capital assets themselves cannot be used to liquidate such liabilities. The District's investment in capital assets includes large furniture purchases for the two offices, improvements, vehicles, and equipment for air monitoring, testing, and data collection.

The increase in net position that is invested in capital assets, net of related debt, of \$155,169 represents capital acquisitions, less current year depreciation and dispositions.

Unrestricted Net Position

The remaining (\$36,106) component of the District's net position is unrestricted and represents a deficit attributable to the reflection of the District net pension liability. Some of the revenue sources, such as DMV fees, restrict expenditures for specific purposes, but do not require that they be returned if unspent in the current year. They may be used to meet the District's ongoing programs associated with them. Other revenues are discretionary and may be used for any ongoing obligations in carrying out day-to-day operations.

Unrestricted net position decreased (\$495,945), or (107.9%) from the previous year from \$459,839 to (\$36,106). The chart at right provides the change in Net Position from the prior years and Net Position trend:

As of June 30, 2015 the District had to report its portion of the net pension liability within the Santa Barbara County Retirement System. As of June 30, 2018, the District reported its portion of the net OPEB asset (liability) within the Santa Barbara County Retirement System.

Analysis of Governmental Activities

The Statement of Activities for District presents its governmental activities, its sole purpose. Governmental functions of the District are predominantly supported by fees, grants, state subvention, late payment penalties, and penalty settlements.

The primary governmental activities of the District include the following: advance clean air technology, ensure compliance with clean air rules, customer service, develop programs to achieve clean air, develop rules to achieve clean air, monitoring air quality, permit issuance review, and policy support, as well as special programs, whose funding have specific mandates.

The following table shows the revenue, expenses, and changes in net position:

CHANGES IN NET POSITION

	Governmental Activities		Changes	
	June 30, 2020	June 30, 2019	Dollar	Percent
Revenues:				
Licenses, permits, and franchises	\$ 3,684,557	\$ 3,779,781	\$ (95,224)	-2.5%
Use of money and property	192,500	255,550	(63,050)	-24.7%
Grants and subventions	3,493,290	3,232,012	261,278	8.1%
Charges for services	3,658,341	3,380,168	278,173	8.2%
Other	6,292	696	5,596	804.0%
Total Revenues	11,034,980	10,648,207	386,773	3.6%
Expenses:				
Air pollution control services:				
Salaries and benefits	6,707,260	5,698,593	1,008,667	17.7%
Services and supplies	4,313,193	3,271,520	1,041,673	31.8%
Other Expenses	161,222	358,515	(197,293)	-55.0%
Depreciation	194,081	153,270	40,811	26.6%
Total Expenses	11,375,756	9,481,898	1,893,858	20.0%
Excess (deficiency) of revenues over expenses	(340,776)	1,166,309	(1,507,085)	-129.2%
Net Position:				
Net position - beginning	1,011,271	(155,038)	1,166,309	-752.3%
Net position - ending	\$ 670,495	\$ 1,011,271	(340,776)	-33.7%

Revenues

Revenues for the District's governmental activities had an overall increase of 3.6% from the prior year. All of the revenues of the District were for air pollution control services and total \$11,034,980 for the year ending June 30, 2020 and \$10,648,207 for the year ending June

30, 2019. The chart to the right provides District revenues by object level as of June 30, 2020.

For the year ending June 30, 2020, 81.5% or \$8,993,304 of District revenues are fee-based, and a chart and table on page 71 of the Statistical Section provide a breakdown of those fees. It is important to note that DMV automobile registration fees of \$2,263,594 are included in the grants and subventions object level, and all of the other fees are included in either the licenses, permits, and franchises; or, charges for services object level of the Statement of Activities. The remaining revenue of \$2,041,676, which is not fee-based, includes penalty settlements, State subvention, Federal EPA grants, use of money and property (interest), and revenue from other governmental agencies.

Use of Money and Property decreased (\$63,050) (24.7%) primarily due to the realization of a smaller unrealized gain of \$34,395, which was \$57,395 less than the unrealized gain from FY 2018-19.

Charges for services increased \$278,173 (8.2%) primarily due to an increase in the Carl Moyer program revenue of \$345,387, which was offset by a decrease in reimbursable services of \$67,672.

Charges for services increased \$278,173 (8.2%) primarily due to an increase in the Carl Moyer program revenue of \$345,387, which was offset by a decrease in reimbursable services of \$67,672.

Expenses

All of the expenses of the District were for air pollution control services and total \$11,375,756 for the year ending June 30, 2020 and \$9,481,898 for the year ending June 30, 2019. The chart to the right provides the District expenses by object level as of June 30, 2020.

Salaries and benefits comprise 58.96% of the District's expenses at \$6,707,260. Salaries and benefits increased \$1,008,667 (17.7%) over the prior year primarily due to an adjustment increasing the net pension.

Services and supplies comprise the second largest portion of the District's expenses at 37.92% or \$4,313,193. Services and supplies increased \$1,041,673 (31.8%) over the prior year primarily because of an increase in ITG/Carl Moyer Program expenses of \$1,588,645, partially offset by a decrease in expenses relating to the DMV Old Car Buyback Program of (\$303,480).

Other expenses comprises 1.42% of the District's expenses at \$161,222. Other expenses decreased (\$197,293) (55.0%) primarily due to the District allowance for doubtful accounts not requiring adjustment during the current fiscal year.

FINANCIAL ANALYSIS OF THE DISTRICT'S FUNDS

The District uses fund accounting to demonstrate compliance with finance related legal requirements.

Governmental Funds

The focus of the District's *governmental funds* is to provide information on near-term inflows, outflows, and balances of *spendable* resources. Such information is useful in assessing the District's financing requirements. In particular, the governmental fund balance is a useful measure of a government's resources available for spending at the end of the fiscal year.

As of the end of the fiscal year, the District's governmental funds reported an ending fund balance of \$9,690,668, an increase of \$151,144 (or 1.58%) in comparison with the prior year.

General Fund

The General Fund is the operating fund of the District, and as a single purpose entity, is the only fund type reported. One measure of the General Fund's liquidity is the comparison of spendable fund balance to total fund balance, which is 99.9%.

One measure of the General Fund's financial health is the comparison of spendable fund balance to operating expenditures, which is 88.9%. Spendable General Fund balance may also serve as a useful measure of the District's net resources available for spending at the end of the fiscal year.

The components of total fund balance are as follows:

Nonspendable

The \$14,486, acquired through employee medical spending forfeitures, is in the form of long term employee loans not to exceed \$2,500 per loan under the District's employee computer automation program, assisting employees in acquiring and sharpening computer literacy skills by providing interest free loans to acquire personal computer equipment and software similar to what employees may be asked to use for District business.

Restricted

Of the \$2,724,619, \$749,528 is restricted to the DMV \$2 program, \$1,629,043 is restricted to the Carl Moyer program, both as part of legislation with very restrictive spending limitations. Additionally, \$277,007 is restricted to the DMV \$4 program. Finally, \$69,041 of unrealized gains under GASB 31 are restricted.

Committed

Of the \$6,951,563, \$550 is in the form of imprest, or petty, cash and is kept on hand, as opposed to in the bank. \$155,906 is committed to ITG projects as part of mitigation agreements with broad spending parameters. \$365,794 is committed to monitoring activities, \$388,223 to data acquisition system activities, and \$586,302 to replace furniture, equipment, and vehicles. \$1,500,000 is a strategic reserve to match 15% of revenues in an effort to provide in case of large emergencies or contingencies. \$200,000 is committed for purchasing landscaping equipment and is funded by excess notice of violation revenue. \$800,000 is committed to the Re-evaluation Cycle revenue stabilization policy in an effort to provide fiscal stability for re-evaluation revenue that fluctuates in three-year cycles. \$2,473,888 is committed to operational activities for fiscal prudence in managing the budgetary condition of the District, and \$480,900 to fund the District's retiree health subsidy. The retiree health subsidy will be gradually transferred over to the Santa Barbara County Employees' Retirement System (SBCERS) at a rate not to exceed 25% of retirement contributions, with the intent of fully funding the promised benefit in four to five years.

A detailed schedule of fund balances can be found in Note II of the notes of the basic financial statements.

CAPITAL ASSETS AND DEBT ADMINISTRATION

Capital Assets

The District's investment in capital assets was \$706,601 (net of accumulated depreciation of \$1,638,241) at June 30, 2020 representing an increase of \$115,169 (or 28.1%) over the prior year. This investment in capital assets includes furniture, laboratory equipment, air monitoring stations, computer and office equipment, leasehold improvements and District vehicles, which are mostly hybrid vehicles.

The additions to capital assets reflect the purchase of seven pieces of equipment, one piece of software, and an office renovation reflected within construction-in-process. The deletions of capital assets reflect the disposal of on vehicle and fully-depreciated furniture in conjunction with the office renovation. Whenever possible, the District donates old equipment to other districts, and old computers to schools. Additional information on the capital assets can be found in Note V of the notes to the basic financial statements.

DEFERRED OUTFLOWS AND DEFERRED INFLOWS OF RESOURCES

Deferred Outflows of Resources

This classification balance, although similar to "assets," is set apart because these items do not meet the technical definition of being a District asset on the date of these financial statements. In other words, these amounts are not available to pay liabilities in the way assets are available.

When all the recognition criteria are met, the deferred outflow of resources will become an expense/expenditure.

The most significant deferred outflow of resources reported are related to the implementation of GASB Statement No. 68 and GASB Statement No. 71 for pension liability reporting, as well as GASB Statement No. 75 for postemployment benefits other than pensions (OPEB) reporting. Consequently, the majority of the deferred outflows of resources reported are comprised of current year contributions to the retirement system. However, there may be some deferred outflows of resources attributable to the various components that impact pension changes, and can include investment changes amortization, changes due to actuarial assumptions, and differences between expected or actual experience (see Note XI and XII for more information on deferred outflows of resources and deferred inflows of resources).

Deferred Inflows of Resources

Deferred inflows of resources are the counterpart to deferred outflows of resources on the Statement of Net Position. Deferred inflows of resources are not technically liabilities of the District as of the date of the financial statements. When all the recognition criteria are met, the deferred inflow of resources will become revenue or an increase to net position.

Deferred inflows of resources related to pensions represent a net amount attributable to the various components that impact pension changes, and can include investment changes amortization, changes due to actuarial assumptions, and differences between expected or actual experience (see Note XI and XII for more information on deferred outflows of resources and deferred inflows of resources).

GENERAL FUND BUDGETARY HIGHLIGHTS

A General Fund Budgetary Comparison Schedule can be found on page 64 that compares fiscal year 2019-20 original budget to the adopted budget. This supplemental schedule reflects a change of \$34,394 in total budgeted revenues and \$375,000 in total budgeted expenditures.

Changes from Original to Final Budgeted Amounts

The use of money and property budgeted revenues increased \$34,646 to account for the unrealized gains in accordance with GASB 31. Charges for services budgeted expenditures decreased \$25,000 as a transfer of appropriations to capital assets. The District was able to purchase additional equipment and office furniture relating to the renovation of Casa Nueva, increasing the capital outlay by \$400,000. This was accomplished by an appropriation from Committed Funds.

Variances with Final Budgeted Amounts

While there were no variances out of budgetary or legal compliance, this resulted in a positive variance of \$2,496,969 between the final adopted budget and actual amount. The following factors contributed to this variance.

Revenues

Licenses, Permits, and Franchises – notice of violation fees were in excess of budget by approximately \$380,000. These unanticipated violations were incurred by primarily three sources. Current year re-evaluation fees trended slightly higher than expectations for a low-year, and accordingly, this resulted in revenues in excess of budget by \$108,344. These were the primary contributing factors to the surplus of \$649,651 in this category.

Charges for Services – Income from the Carl Moyer Program was lower than anticipated, by \$77,835, in addition to a lower level of reimbursable services revenue than budget of \$255,060. These two changes comprise the majority of the reduction of (\$328,133) for this revenue category.

Expenditures

Services and Supplies – were \$1,724,300 lower than originally budgeted primarily due to less expenditures outside of passthrough specifically for professional services, as well as continued focus on reducing expenditures when possible.

ECONOMIC FACTORS AND NEXT YEAR'S BUDGET AND RATES

The following known factors were considered in preparing the District's budget for FY 2020-21.

Revenues

- Due to COVID-19, the District will forego a 3.3% increase in its District Rule 210 fee revenues in order to provide relief to its local sources during the economic downturn.
- We are entering the high-year in the three-year re-evaluation cycle in FY 2020-21. Compared to FY 2019-20 adopted fees of \$668,783, FY 2020-21 adopted amount is \$1,018,791, or a \$350,008 increase.
- The state Legislature, through the budget adoption process, continues to place a strong emphasis on the use of funding for voluntary emission reduction programs through the network of local air districts. This action resulted in a total of over \$2.2 million for Santa Barbara County projects in FY 2020-21, which is a 17.4% decrease in grant funds received in the current year. These funds will be used to continue expanding the reach of the grant programs that were initiated in FY 2018-19, including the Carl Moyer, Community Air Protection, and FARMER programs. These one-time revenue sources will provide \$329,907 in administrative funds to implement the grant programs.
- The Federal grant from EPA is anticipated to be \$513,000 which is consistent with the prior year.

Expenditures

- Services and supplies decreased by \$163,757 due to renegotiation of the office lease in Santa Barbara, equating to roughly \$100,000 in savings per year.
- For FY 2020-21, the District budget includes three large one-time projects. The first one-time budget item is utilization of reserves for the purchase of an office building in north county for our north county staff. The purchase will allow the District to invest in property that will increase in value at a rate greater than what is currently occurring with our pooled cash account, while simultaneously reducing the office rental cost for our current location in Santa Maria. The second large one-time expense is the purchase of air monitoring equipment for the Santa Maria network station the District is taking over from California Air Resources Board (CARB) - additional equipment is budgeted to bring this station up to the District's normal operating specifications. Lastly, funds have been earmarked to implement the Air Quality Emergency Response Plan which includes communication tools and battery backups for the District's critical infrastructure.

REQUESTS FOR INFORMATION

This financial report is designed to provide a general overview of the District's finances. Questions concerning any of the information provided in this report should be addressed to

RECONCILIATION OF GOVERNMENTAL FUNDS BALANCE SHEET TO GOVERNMENT-WIDE STATEMENT OF NET POSITION

As of June 30, 2020

Fund Balances - Total Governmental Funds (General Fund)	\$ 9,690,668
---	--------------

Amounts reported for governmental activities in the Statement of
Net Position are different because:

Capital assets, net of accumulated depreciation, have not been
included as financial resources in governmental funds activity.
These capital assets are reported as an adjustment to arrive
at the Statement of Net Position as capital assets of APCD
as a whole.

Capital assets	\$ 2,344,842	
Accumulated depreciation	(1,638,241)	
	<u>\$ 706,601</u>	706,601

Deposits on future furniture and equipment have not been included included as financial resources in governmental funds activity. This is reported as an adjustment to arrive at the Statement of Net Position as a deposit of APCD as a whole.	113,133
--	---------

Deferred pensions outflows of resources are for obligations that do not require the use of current financial resources and therefore are not reported as assets in the governmental funds.	4,265,706
--	-----------

Deferred OPEB outflows of resources are for obligations that do not require the use of current financial resources and therefore are not reported as assets in the governmental funds.	277,304
--	---------

The net accrued OPEB asset is for obligations that do not require the use of current financial resources and therefore are not reported as an asset in the governmental funds.	124,931
--	---------

All liabilities, both current and long-term, are reported in the
Statement of Net Position.

Compensated absences	(383,419)
Net Pension Liability	(11,860,437)

Deferred pensions inflows of resources are for obligations that do not require the use of current financial resources and therefore are not reported as a liability in the governmental funds.	(2,209,925)
--	-------------

Deferred OPEB inflows of resources are for obligations that do not require the use of current financial resources and therefore are not reported as a liability in the governmental funds.	<u>(54,067)</u>

(1) Please see the Reconciliation of the Governmental Funds Statement of Revenues, Expenditures, and Changes in Fund Balances to the Government-wide Statement of Activities schedule on the following page.

See accompanying Notes to the Basic Financial Statements.

RECONCILIATION OF GOVERNMENTAL FUNDS STATEMENT OF REVENUES, EXPENDITURES, AND CHANGES IN FUND BALANCES TO GOVERNMENT-WIDE STATEMENT OF ACTIVITIES

For the Fiscal Year Ended June 30, 2020

Net Change in Fund Balances - Total Governmental Funds (General Fund)	\$	151,144
---	----	---------

Amounts reported for governmental activities in the Statement of Activities are different because:

Governmental funds report capital outlays as expenditures. In turn, in the Government-wide Statement of Activities and Changes in Net Position, the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. Therefore, depreciation must be added, and capital outlays must be removed.

Depreciation	\$	(194,081)	
Capital outlay		462,383	
	\$	<u>268,302</u>	268,302

Other post-employment benefits (OPEB) and pension expenses were reported in the Government-wide Statement of Activities and Changes in Net Position, but because they do not require the use of current financial resources, the increase or decrease in the net OPEB asset and net pension liability were not reported as an expenditure in the governmental funds.

OPEB credit		129,238
Net pension expense		(883,653)

Compensated absences is reported in the Government-wide Statement of Activities and Changes in Net Position, but it does not require the use of current financial resources. Therefore, it is not reported as expenditures in governmental funds.

See accompanying Notes to the Basic Financial Statements.

NOTES TO THE BASIC FINANCIAL STATEMENTS

As of June 30, 2020

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. The Reporting Entity

The Air Pollution Control District (the District) of the County of Santa Barbara was formed by Santa Barbara County Board of Supervisor Resolution 70-581 in 1970. The District Board of Directors (Board) includes the five members of the County Board of Supervisors and one representative from each of the County's eight cities. The Board is the governing body of the District and is responsible for its legislative and executive control. The District was established pursuant to Section 40000 et seq. of the State of California Health and Safety Code. The District acts as a legal entity, separate and distinct from the County of Santa Barbara. As required by accounting principles generally accepted in the United States of America (GAAP), the accompanying basic financial statements present the activities of the District for which the District is considered to be financially accountable.

B. New Accounting Pronouncements

The following Governmental Accounting Standards Board (GASB) Statement has been implemented in the current financial statements:

Statement No. 95: *Postponement of the Effective Dates of Certain Authoritative Guidance* was implemented to provide temporary relief to governments and other stakeholders in light of the COVID-19 pandemic. This was accomplished by postponing pronouncement dates. The adoption of this standard did not have a material impact on the District.

Future Governmental Accounting Standards Board (GASB) Statements

The Governmental Accounting Standards Board Statements listed below will be implemented in future financial statements. These statements will be evaluated by the District to determine if they will have a material impact to the financial statements once effective.

Statement No. 87	"Leases"	The requirements of this statement are effective for fiscal years beginning after June 15, 2021. (FY 21/22)
Implementation Guide 2019-3	"Leases"	The requirements of this implementation guide are effective for fiscal years beginning after June 15, 2021. (FY 21/22)
Statement No. 92	"Omnibus 2020"	The requirements of this statement are effective for fiscal years beginning after June 15, 2021. (FY 21/22)

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – Continued

C. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows.

Governmental funds financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. The District in general considers revenues available if they are collected within 60 days after year-end. Grants and similar items are recognized as revenue as soon as all eligibility requirements have been met. Expenditures are recorded when the related fund liability is incurred, except for un-matured interest on general long-term debt which is recognized when due, and certain compensated absences and claims and judgments which are recognized when payment is due.

For the governmental funds financial statements, the District considers all revenues susceptible to accrual and recognizes revenue if the accrual criteria are met. Specifically, licenses, permits, franchises, interest (use of money and property), charges for services, and other miscellaneous revenue are all considered to be susceptible to accrual and have been recognized as revenue in the current fiscal period.

Expenditure-driven grant revenue is recognized when the qualifying expenditures have been incurred and all other eligibility requirements have been met. Grant revenue is recorded at the time of receipt or earlier, if the susceptible-to-accrual criteria are met.

The accounts of the District are organized on the basis of funds. A fund is an independent fiscal and accounting entity with a self-balancing set of accounts. Fund accounting segregates funds according to their intended purpose and is used to aid management in demonstrating compliance with finance-related legal and contractual provisions.

The minimum number of funds is maintained consistent with legal and managerial requirements. The District is a special-purpose government engaged in a single governmental program, and is presented accordingly in the basic financial statements.

The District reports the following major governmental fund:

The *General Fund* is the District's primary operating fund. It accounts for all the financial resources and the legally authorized activities of the District except those required to be accounted for in other specialized funds.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – Continued

C. Measurement Focus, Basis of Accounting, and Financial Statement Presentation – Continued

The basic financial statements of the District are composed of the following.

- Combined Government-wide and Governmental Fund financial statements.
- Reconciliations between the Government-wide and Governmental Fund financial statements.
- Notes to the basic financial statements.

D. Assets, Liabilities, and Net Position or Equity

1. Cash and Cash Equivalents

The District's cash and cash equivalents are considered to be cash on hand, demand deposits and investments held by the County Treasurer in a cash management investment pool (pool).

The pool is not registered as an investment company with the Securities and Exchange Commission (SEC) nor is it an SEC Rule 2a7-like pool. California Government Code statutes and the County Treasury Oversight Committee set forth the various investment policies that the County Treasurer must follow.

State statutes and the County's investment policy authorize the County Treasurer to invest in U.S. Government Treasury and Agency Securities, bankers' acceptances, commercial paper, corporate bonds and notes, repurchase agreements and the State Treasurer's Local Agency Investment Fund (LAIF).

In accordance with GASB Statement No. 31, *Accounting and Financial Reporting for Certain Investments and External Investment Pools*, investments held by the County Treasurer are stated at fair value. The fair value of pooled investments is determined quarterly and is based on current market prices received from the securities custodian. The fair value of participants' position in the pool is the same as the value of the pool shares. The method used to determine the value of participants' equity withdrawn is based on the book value of the participants' percentage participation at the date of such withdrawal. LAIF is required to invest in accordance with State statutes. The Local Investment Advisory Board (LAIF Board) has oversight responsibility for LAIF. The LAIF Board consists of five members as designated by State Statute (see Note III).

2. Restricted Cash and Investments

Restricted cash and investments reflect cash received from District permit holders. These deposits are held until completion of permit holders' projects (see Note IV).

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – Continued

D. Assets, Liabilities, and Net Position or Equity – Continued

3. Accounts Receivables and Payables

The District only accrues revenues quarterly and at fiscal year-end. Included are revenues from permits, of which a portion may not be collectible; as such the District has an allowance of \$236,274 for uncollectible accounts, and accounts receivable is reported net. All accounts receivable are expected to be collected within one year. Interest receivable represents the last quarter of interest that has been earned, but not distributed as of the close of the fiscal year.

Employee receivables represent loans to assist employees in acquiring personal computer equipment and software similar to what employees may be asked to use for District business. Funding for these loans is provided from employee medical spending account forfeitures.

The District only accrues expenditures at fiscal year-end. Accrued expenses and salaries and benefits payable are for goods and services paid during the fiscal year, but will not clear the bank until after June 30, 2020. In addition, the district has a payable for deposits by permit holders (see Note IV).

4. Deferred Outflows and Inflows of Resources

Pursuant to GASB Statement No. 63, *“Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources, and Net Position,”* and GASB Statement No. 65, *“Items Previously Reported as Assets and Liabilities,”* the District recognizes deferred outflows and inflows of resources.

In addition to assets, the Statement of Financial Position will sometimes report a separate section for deferred outflows of resources. A deferred outflow of resources is defined as a consumption of net position by the District that is applicable to a future reporting period. The District has two items which qualify for reporting in this category; refer to Note XI and Note XII for detailed listings of the deferred outflows of resources the District has recognized.

In addition to liabilities, the Statement of Financial Position will sometimes report a separate section for deferred inflows of resources. A deferred inflow of resources is defined as an acquisition of net position by the District that is applicable to a future reporting period. The District has two items which qualify for reporting in this category; refer to Note XI and Note XII for detailed listings of the deferred inflows of resources the District has recognized.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – Continued

D. Assets, Liabilities, and Net Position or Equity – Continued

5. Capital Assets and Depreciation

Equipment and furniture are valued at cost unless obtained by donation in which case the assets are recorded at the appraised value at the date of receipt. The capitalization

Thresholds are \$5,000 for equipment and \$25,000 for buildings and improvements (see Note V). Repair and maintenance costs are charged to current expenditures as incurred. Equipment disposed of or no longer required for its existing use is removed from the records at actual or estimated cost.

Depreciation is charged as an expense against operations, and accumulated depreciation is reported on the respective balance sheet. Property, plant, and equipment of the District are depreciated using the straight-line method over the following useful lives:

<u>Assets</u>	<u>Years</u>
Equipment:	
Automobiles and light trucks	5 to 10
General machinery and equipment	5 to 20
Furniture	7
Leasehold Improvements	20
Software	3

6. Long-Term Obligations

In the government-wide financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities statement of net position.

7. Employee Compensated Absences

Regular full-time employees accumulate vacation time, sick leave, compensatory time, and other leave time. Certain restrictions apply with respect to the accumulation of leave time and its payment at termination. All vacation, sick leave, compensatory time, and other leave time are accrued when incurred in the government-wide financial statements. A liability for these amounts is reported in governmental funds only if they have matured, for example, as a result of an employee retirement (see Note VIII).

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – Continued

D. Assets, Liabilities, and Net Position or Equity – Continued

8. Pensions

In government-wide financial statements, retirement plans (pensions) are required to be recognized and disclosed using the accrual basis of accounting (see Note XI and the required supplementary information (RSI) section immediately following the Notes to Financial Statements), regardless of the amount recognized as pension expenditures on the governmental fund statements, which use the modified accrual basis of accounting.

In general, the District recognizes a net pension liability, which represents the District's proportionate share of the excess of the total pension liability over the fiduciary net position of the pension reflected in the actuarial report provided by the Santa Barbara County Employees' Retirement System (SBCERS). The net pension liability is measured as of the District's prior fiscal year-end. Changes in the net pension liability are recorded, in the period incurred, as pension expense or as deferred inflows of resources or deferred outflows of resources depending on the nature of the change. The changes in net pension liability that are recorded as deferred inflows of resources or deferred outflows of resources (that arise from changes in actuarial assumptions or other inputs and differences between expected or actual experience) are amortized over the weighted average remaining service life of all participants in the respective pension plan and are recorded as a component of pension expense beginning with the period in which they are incurred.

For purposes of measuring the net pension liability and deferred outflows/inflows or resources relating to pensions and pension expense, information about the fiduciary net position of the District's pension plan with SBCERS and additions to/deductions from the plan's fiduciary net position have been determined on the same basis as they are reported by SBCERS.

For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefits terms. Investments are reported at fair value.

Projected earnings on pension investments are recognized as a component of pension expense. Differences between projected and actual investment earnings are reported as deferred inflows of resources or deferred outflows of resources and amortized as a component of pension expense on a closed basis over a five-year period beginning with the period in which the difference occurred. Each subsequent year will incorporate an additional closed basis five-year period of recognition.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – Continued

D. Assets, Liabilities, and Net Position or Equity – Continued

9. Postemployment Benefits Other Than Pensions (OPEB)

In government-wide financial statements, postemployment benefits other than pensions (OPEB) are required to be recognized and disclosed using the accrual basis of accounting (see Note XII and the required supplementary information (RSI) section immediately following the Notes to Financial Statements), regardless of the amount recognized as pension expenditures on the governmental fund statements, which use the modified accrual basis of accounting.

In general, the District recognizes a net OPEB asset (liability), which represents the District's proportionate share of the excess of the total OPEB liability over the fiduciary net position of the OPEB reflected in the actuarial report provided by the Santa Barbara County Employees' Retirement System (SBCERS). The net OPEB asset (liability) is measured as of the District's prior fiscal year-end. Changes in the net OPEB asset (liability) are recorded, in the period incurred, as OPEB expense or as deferred inflows of resources or deferred outflows of resources depending on the nature of the change. The changes in net OPEB asset (liability) that are recorded as deferred inflows of resources or deferred outflows of resources (that arise from changes in actuarial assumptions or other inputs and differences between expected or actual experience) are amortized over the weighted average remaining service life of all participants in the respective OPEB plan and are recorded as a component of OPEB expense beginning with the period in which they are incurred.

For purposes of measuring the net OPEB asset (liability), deferred outflows of resources and deferred inflows of resources related to OPEB, and OPEB expense, information about the fiduciary net position of the Santa Barbara County Employees' Retirement System (SBCERS) Plan (Plan) and additions to/deductions from Plan's fiduciary net position have been determined on the same basis as they are reported by the Plan. For this purpose, the Plan recognizes benefit payments when due and payable in accordance with the benefit terms.

Investments are reported at fair value, except for money market investments and participating interest-earning investment contracts that have a maturity at the time of purchase of one year or less, which are reported at cost.

Projected earnings on OPEB investments are recognized as a component of OPEB expense. Differences between projected and actual investment earnings are reported as deferred inflows of resources or deferred outflows of resources and amortized as a component of OPEB expense on a closed basis over a five-year period beginning with the period in which the difference occurred. Each subsequent year will incorporate an additional closed basis five-year period of recognition.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – Continued

D. Assets, Liabilities, and Net Position or Equity – Continued

10. Fund Equity (Fund Balances)

Portions of fund balances are nonspendable and are therefore, not available for appropriation. Spendable fund balances in the General Fund are classified based on the relative strength of the constraints that control the purposes for which the amounts can be spent (see Note II).

11. Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenditures during the reporting period. Actual results could differ from those estimates.

II. FUND BALANCES

As of June 30, 2020, fund balances of the governmental funds are classified as follows:

Nonspendable: amounts that cannot be spent either because they are in nonspendable form or because they are legally or contractually required to be maintained intact.

Restricted: amounts that are constrained for a specific purpose through restrictions of external parties (i.e. creditors, grantors, contributors, or laws or regulations of other governments), or by constitutional provision or enabling legislation.

Committed: amounts that can be used only for specific purposes determined by a formal action of the District Board. The District Board is the highest level of decision-making authority for the District. Commitments may be established, modified, or rescinded only through ordinances or resolutions approved by the District Board.

Assigned: amounts that do not meet the criteria to be classified as restricted or committed but that are intended to be used for specific purposes, as expressed by (a) the Board itself or (b) a body (e.g. budget or finance committee) or the APCO to which the Board has delegated the authority to assign the amounts.

Unassigned: all other spendable amounts.

As of June 30, 2020, fund balances are composed of the following:

Fund balances:

Nonspendable:

Employee loans - computer automation program	\$	14,486
--	----	--------

Restricted for:

DMV \$2 Grants	749,528
Carl Moyer Grants	1,629,043
DMV \$4 Programs	277,007
Unrealized Gains (GASB 31 FMV Adjustment)	69,041

II. FUND BALANCES – Continued

Fund balances - continued:

Committed to:

Imprest cash	550
ITG Projects	155,906
Capital Replacement	586,302
Data Acquisition System	388,223
Strategic Reserve	1,500,000
Retiree Health Subsidy	480,900
Monitoring	365,794
SEP	200,000
Reevaluation Cycle	800,000
Operational Activities	2,473,888
Total fund balances	<u>\$ 9,690,668</u>

When an expenditure is incurred for purposes for which both restricted and unrestricted fund balance is available, the District considers restricted funds to have been spent first. When an expenditure is incurred for which committed, assigned, or unassigned fund balances are available, the District considers amounts to have been spent first out of committed funds, then assigned funds, and finally unassigned funds, as needed, unless the District Board has provided otherwise in its commitment or assignment actions.

III. CASH AND INVESTMENTS

Cash and investments include the cash balances of the District's General Fund and Trust Fund, which are consolidated and invested by the County Treasurer (Treasurer) in a cash management investment pool (pool), for the purpose of increasing interest earnings through investment activities. The pool is not registered as an investment company with the Securities and Exchange Commission (SEC) nor is it an SEC Rule 2a7-like pool. Interest earned on pooled investments is apportioned quarterly to District's participating funds based upon each fund's average daily deposit balance.

California Government Code statutes and the County Treasury Oversight Committee set forth the various investment policies that the County Treasurer must follow. These pooled funds are reported on an amortized cost basis. All investors in the Pool proportionately share any gains or losses. Credit and market risk is unknown for the District's Pool share. The fair value of the Pool is based on the value of the Pool shares.

The Treasurer participates in the State of California Local Agency Investment Fund (LAIF). Investments in the LAIF are governed by State statutes and overseen by a five-member Local Investment Advisory Board.

The District has not provided nor obtained any legally binding guarantees during the fiscal year ended June 30, 2020 to support the value of shares in the pool.

III. CASH AND INVESTMENTS – Continued

Additional information and separately issued financial statements of the County of Santa Barbara can be obtained from the Santa Barbara County Auditor-Controller, PO Box 39, Santa Barbara, CA 93102-0039.

A. Custodial Credit Risk Related to Deposits

The custodial credit risk for deposits is the risk that the District will not be able to recover deposits or will not be able to recover collateral securities that are in possession of an outside party. This risk is mitigated in that the District's bank deposits are insured by the Federal Depository Insurance Corporation (FDIC) up to \$250,000. The remaining balance on deposit is collateralized with securities held by the pledging financial institution's agent. Per Government Code Section 53652, the depository is required to maintain a market value of at least 110% of the pledged collateral.

B. Investments

The District is a voluntary participant in the Treasurer's investment pool that is regulated by the California Government Code under oversight of the Treasurer of the State of California.

Pursuant to Section 53646 of the State of California Government Code the Treasurer prepares an *Investment Policy Statement* (Policy) annually, presents it to the Treasury Oversight Committee for review and to the Board of Supervisors for approval.

After approval, the policy is forwarded to the California Debt and Investment Advisory Commission.

The policy provides the basis for the management of a prudent, conservative investment program. Public funds are invested to provide the maximum security of principal with secondary emphasis on achieving the highest return, while meeting daily cash flow needs. All investments are made in accordance with the California Government Code and, in general, the Treasurer's policy is more restrictive than State law.

Types of securities in which the Treasurer may invest include U.S. Treasury and U.S. Government agency securities; State and/or local agency bonds, notes, warrants or certificates of indebtedness; bankers' acceptances; commercial paper; corporate bonds and notes; negotiable certificates of deposit; repurchase agreements; reverse repurchase agreements; securities lending; bank deposits; money market mutual funds; the State of California Local Agency Investment Fund (LAIF); and the Investment Trust of California (CalTRUST).

III. CASH AND INVESTMENTS – Continued

B. Investments – Continued

1. Credit Risk and Concentration of Credit Risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. Concentration of credit risk is the risk of loss attributed to the magnitude of an investment in a single issuer. The Treasurer mitigates these risks by holding a diversified portfolio of high-quality investments.

The Policy sets specific parameters on the credit quality of investment purchases. Securities issued and fully guaranteed as to payment by an agency or government sponsored enterprise of the U.S. Government be rated AAA by at least two of the three major rating services, i.e. Fitch, Moody's and Standard & Poor's (S&P). Commercial paper obligations and negotiable certificates of deposit shall be rated by at least two of the three major rating services at a minimum of F1 by Fitch, P-1 by Moody's and A-1 by S&P. Corporate notes, with a maturity greater than three years, shall be rated AA by at least two of the three major rating services. Corporate notes, with a maturity of three years or less, shall be rated AA- by at least two of the three major ratings services. Corporate Temporary Liquidity Guarantee Program (TLGP) notes shall be rated AAA by one of the three major ratings services.

At the time of purchase, the Treasurer's investment policy dictates that no more than 5% of the total portfolio be invested in the securities of any single issuer, other than the U.S. Government, its agencies, and sponsored enterprises. As of the fiscal year ended June 30, 2020, the pooled investments did not exceed the 5% limit. The following is a summary of the credit quality distribution by investment type at June 30, 2020:

Investment Type	Total	% of Portfolio	Exempt from Disclosure	Minimum Legal Rating
Cash equivalents and investments in County Investment Pool	\$ 9,981,236	100%	\$ -	Not Rated
Total cash and investments	<u>\$ 9,981,236</u>		<u>\$ -</u>	

2. Custodial Credit Risk

Custodial credit risk for investments is the risk that the District will not be able to recover the value of investment securities that are in the possession of an outside party.

All securities owned by the Treasurer, on the District's behalf, are deposited in trust for safekeeping with a custodial bank different from the Treasurer's primary bank. Securities are not held in broker accounts.

III. CASH AND INVESTMENTS – Continued

B. Investments – Continued

3. Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The County Treasurer mitigates this risk by making longer-term investments only with funds that are not needed for current cash flow purposes and holding these securities to maturity.

The maturity of investments purchased is governed by a demand for funds analysis of prior periods' revenues and expenditures, and is also determined by current cash flow demands assessed on an ongoing basis. The Treasurer's Investment Policy also dictates that the final maturity date of any individual security shall not exceed five years and that long-term investments, in the aggregate, shall not exceed 75% of the portfolio.

The fair value of investments generally changes with the fluctuations of interest rates. In a rising interest rate market, the fair value of investments could decline below original cost; conversely, when interest rates decline, the fair value of investments increases. The Treasurer believes liquidity in the portfolio is sufficient to meet cash flow needs and to preclude the Treasurer from having to sell investments below original cost.

The Treasurer may purchase securities at a discount from face value to earn higher than nominal rates of return. Under GASB 31, *Accounting and Financial Reporting for Certain Investments and for External Investment Pools*, such discount, when realized, is considered gain rather than interest. The calculation of realized gains and losses is independent of a calculation of the net change in the fair value of investments. Realized gains and losses on investments that had been held in more than one fiscal year and sold in the current year were included as a change in the fair value of investments reported in the prior year(s).

Information about the sensitivity of the fair values of the District's investment to market interest rate fluctuation is provided by the following table that shows the average maturity date of each investment.

	Total	Remaining Maturity 12 Months or Less
Cash equivalents and investments in County Investment Pool	\$ 9,981,236	\$ 9,981,236
Total cash and investments	\$ 9,981,236	\$ 9,981,236

III. CASH AND INVESTMENTS – Continued

C. Cash and Investments Held by the Treasurer

The following is a summary of investments held by the Treasurer, on behalf of the District, as of June 30, 2020:

Statement of net position:

Cash and investments	\$ 9,981,786
Total cash and investments	<u>\$ 9,981,786</u>

Cash and investments as of June 30, 2020 consists of the following:

Cash on hand	\$ 550
Cash equivalents and investments in County Investment Pool	<u>9,981,236</u>
Total cash and investments	<u>\$ 9,981,786</u>

The portion of cash and investments as of June 30, 2020, that is restricted is as follows:

Total unrestricted cash and investments	\$ 9,378,904
Restricted cash and investments (note IV)	<u>602,882</u>
Total cash and investments	<u>\$ 9,981,786</u>

IV. RESTRICTED CASH AND INVESTMENTS AND PERMIT HOLDERS PAYABLE

Cash and investments at June 30, 2020 that are restricted by legal or contractual requirements are listed in the following table. An offsetting permit holder's payable has also been recorded at an equivalent amount.

General Fund	
Permit holder deposits	\$ 602,882
Total restricted cash and investments	<u>\$ 602,882</u>

V. CAPITAL ASSETS

Capital assets activity for the year ended June 30, 2020 is as follows:

	Balance July 1, 2019	Additions	Deletions	Balance June 30, 2020
Governmental activities:				
Capital assets, being depreciated:				
Furniture	\$ 399,028	\$ -	\$ (164,228)	\$ 234,800
Equipment including Leasehold improvements	1,690,190	77,787	(20,997)	1,746,980
Software	91,599	28,675	-	120,274
Construction in progress	-	242,788	-	242,788
Total capital assets, being depreciated	<u>2,180,817</u>	<u>349,250</u>	<u>(185,225)</u>	<u>2,344,842</u>
Less accumulated depreciation for:				
Furniture	(399,028)	-	164,228	(234,800)
Equipment including Leasehold improvements	(1,212,037)	(151,335)	20,997	(1,342,375)
Software	(18,320)	(42,746)	-	(61,066)
Total accumulated depreciation	<u>(1,629,385)</u>	<u>(194,081)</u>	<u>185,225</u>	<u>(1,638,241)</u>
Total capital assets, net	<u>\$ 551,432</u>	<u>\$ 155,169</u>	<u>\$ -</u>	<u>\$ 706,601</u>

VI. LEASE OBLIGATIONS

Operating Leases

The following is a schedule by years of future minimum rental payments required under the operating lease entered into by the District that has initial or remaining non-cancelable lease terms in excess of one year as of June 30, 2020. The lease obligation is with the County of Santa Barbara (see Note VII).

Year Ending June 30,	
2021	\$ 243,275
2022	243,275
2023	243,275
2024	243,275
2025	243,275
2026-2030	1,216,375
2031-2033	689,279
Total Minimum Payments Required	<u>\$ 3,122,029</u>

Total rental expenditure/expense for the year ended June 30, 2020 was \$293,314.

VII. RELATED PARTY TRANSACTIONS

The District utilizes the Financial Information Network of the County of Santa Barbara for the maintenance of its books and records. Financial transactions are initiated and approved by the District, and the County Auditor-Controller performs data entry, report generation, warrant issuance, and other related functions for the District.

The District is not a component unit of the County of Santa Barbara; however, the cash assets of the District are included in the basic financial statements of the County of Santa Barbara in an investment trust fund.

The District typically reimburses the County of Santa Barbara for a share of County overhead and other services costs. For the year ended June 30, 2020, the County of Santa Barbara was paid \$19,254 for allocated overhead costs.

The District has one lease outstanding at June 30, 2020 with the County of Santa Barbara for the Casa Nueva building, with a 30-year term, and total minimum remaining payments of \$3,122,029, respectively (see Note VI). See Note XIV for discussion of an amendment to this lease subsequent to June 30, 2020.

The District subleases a portion of its Santa Maria office to the Santa Barbara County Association of Governments (SBCAG) for \$2,385 annually, plus a share of common area cost.

The District shares tenancy of Casa Nueva with SBCAG and the County and allocates costs to the co-tenants for various utilities and common area services.

VIII. EMPLOYEE COMPENSATED ABSENCES

Compensated absences are liquidated through the General Fund. The following is a summary of the employee compensated absences of the District for the year ended June 30, 2020.

	Balance July 1, 2019	Additions	Deletions	Balance June 30, 2020	Due Within One Year
Governmental activities:					
Employee compensated absences	\$ 377,612	\$ 324,646	\$ (318,839)	\$ 383,419	\$ 383,419
Total employee compensated absences	<u>\$ 377,612</u>	<u>\$ 324,646</u>	<u>\$ (318,839)</u>	<u>\$ 383,419</u>	<u>\$ 383,419</u>

IX. COMMITMENTS AND CONTINGENCIES

The management of the District is not aware of any outstanding claims or litigation liabilities. The District recognizes as revenue, grant monies received as reimbursement for costs incurred in certain federal and state programs it administers. Although the District's grant programs have been audited through June 30, 2020, the amount, if any, of expenditures which may be disallowed by the granting agencies cannot be determined at this time, although the District expects such amounts, if any, to be immaterial.

X. RISK FINANCING AND BUSINESS RISKS

The Air Pollution Control District is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; and injuries to employees. These risks are covered by commercial insurance purchased from independent third parties. There have been no reductions in insurance coverage as compared to the previous year, only changes in how the types of coverage and deductibles are described. It should also be noted that there aren't any incurred but not reported (IBNR) claims payable for the year ending June 30, 2020. For the past three fiscal years, no settlement amounts have exceeded insurance coverage.

On January 30, 2020, the World Health Organization declared the coronavirus outbreak a "Public Health Emergency of International Concern" and on March 10, 2020, declared it to be a pandemic. Actions taken around the world to help mitigate the spread of the coronavirus include restrictions on travel, quarantines in certain areas, and forced closures for certain types of public places and businesses. The coronavirus and actions taken to mitigate it have had and are expected to continue to have an adverse impact on the economies and financial markets of many countries, including the geographical areas in which the District operates. While it is unknown how long these conditions will last and what, if any, the financial effect will be to the District, the District could be impacted by declining revenue if economic conditions worsen. Additionally, it is reasonably possible that estimates made in the financial statements have been, or will be, materially and adversely impacted in the near term as a result of these conditions, including expected credit losses on receivables.

XI. RETIREMENT PLAN

A. Plan Description

The Santa Barbara County Employees' Retirement System (Retirement System) was established on January 1, 1944, and is administered by the Board of Retirement to provide service retirement, disability, death, and survivor benefits for its employees and contracting districts. It is governed by the California Constitution, California State Government Code § 31450 (County Employees' Retirement Law of 1937 (CERL)), and the bylaws, policies and procedures adopted by the Retirement System's Board of Retirement. The Santa Barbara County Board of Supervisors may also adopt resolutions, as permitted by the CERL, which may affect the benefits of the Retirement System members.

The Retirement System operates a cost sharing multiple-employer defined benefit plan. Members include all permanent employees working full time or at least 50% part time for the District, as well as the County of Santa Barbara (County), Carpinteria-Summerland Fire Protection District, Mosquito and Vector Management District of Santa Barbara County, Goleta Cemetery District, Santa Maria Cemetery District, Oak Hill Cemetery District, Carpinteria Cemetery District, Summerland Sanitary District, Santa Barbara County Association of Governments, and the Santa Barbara County Superior Court. The Retirement System has one District retirement plan with four tiers, of which, one tier is currently available to new employees. All plans provide benefits as defined by law upon retirement, death, or disability of members based on age, years of service, final average salary (generally 12 highest consecutive months), and the benefit options selected.

B. Fiduciary Responsibility

The Retirement System, governed by the Board of Retirement, is a fiduciary for the accounting and control of member and employer contributions, investment income and member benefits. The Board of Retirement is responsible for establishing policies governing the administration of the retirement plan and managing the investment of the Retirement System's assets under authority granted by Article XVI of the Constitution of the State of California. Article XVI, Section 17(a) provides the Retirement Board has the "sole and exclusive responsibility to administer the system in a manner that will assure prompt delivery of benefits and related services to the participants and their beneficiaries." Section 17(b) further provides that "members of the Retirement Board of a public retirement system shall discharge their duties...solely in the interest of, and for the exclusive purpose of providing benefits to participants and their beneficiaries, minimizing employer contributions thereto, and defraying reasonable expenses of administering the system. A Retirement Board's duty to its participants and their beneficiaries shall take precedence over any other duty."

XI. RETIREMENT PLAN - Continued

B. Fiduciary Responsibility - Continued

The Board consists of nine members and two alternates. These positions are filled as follows: County Board of Supervisors appoints four, members of the Retirement System elect six (including the two alternates), and the County Treasurer-Tax Collector is an ex-officio member. The Retirement System is a legally separate entity and is not a component unit of the District. It publishes its own Comprehensive Annual Financial Report and receives its own independent audit.

Additional detailed information and separately issued financial statements of the Retirement System can be obtained at 3916 State St. Suite 210, Santa Barbara, CA 93105.

C. Benefits Provided

All pension plans provide benefits, in accordance with CERL regulations, upon retirement, disability or death of members. Retirement benefits are based on years of service, final average compensation, and retirement age. Employees terminating before accruing 5 years of retirement service credit (5 vesting) forfeit the right to receive retirement benefits unless they establish reciprocity with another public agency within the prescribed time period. Non-vested employees who terminate service are entitled to withdraw their accumulated contributions plus accrued interest.

Employees who terminate service after earning 5 years of retirement service credit may leave their contributions on deposit and elect to take a deferred retirement. Differences between expected or actual experience for vested and non-vested benefits may result in an increase or decrease to pension expense and net pension liability.

Service-related disability benefits are based upon final average compensation or retirement benefits (if eligible). Non-service related disability benefits are based on 1) years of service and final average compensation or 2) retirement benefits (if eligible).

Death benefits are based upon a variety of factors including whether the participant was retired or not. Annual cost-of-living adjustments (COLAs) after retirement are provided in all plans. COLAs are granted to eligible retired members each April based upon the Bureau of Labor Statistics Average Consumer Price Index (CPI) for All Urban Consumers for the Los Angeles-Riverside-Orange County area as of the preceding January 1 and is subject to an annual maximum dependent upon the provisions of the pension plans. Specific details for the retirement, disability or death benefit calculations and COLA maximums for each of the pension plans are available in the SBCERS' Comprehensive Annual Financial Report (CAFR). The SBCERS' CAFR is available online at: <http://cosb.countyofsb.org/sbcers/default.aspx?id=19040>.

XI. RETIREMENT PLAN - Continued

D. Contributions

Per Article 16 of the Constitution of the State of California, contribution requirements of the active employees and the participating employers are established and may be amended by the SBCERS Board of Retirement. Depending upon the applicable plan, employees are required to contribute a certain percent of their annual pay. For each of the plans, the County's contractually required contribution (formerly known as the actuarially required contribution (ARC)) rate for the year ended June 30, 2020, was a specified percent of annual payroll, actuarially determined as an amount that, when combined with employee contributions, is expected to finance the costs of benefits earned by employees during the year. Additional amounts required to finance any unfunded accrued liability are the responsibility of the plan sponsors.

Active members are plan members who are currently accruing benefits and/or paying contributions into the applicable plan. Employer and employee contribution rates are as follows:

	APCD Plan 1	APCD Plan 2	General Plan 7	General Plan 8
	Employees hired before July 2, 1995 may continue the plan	Employees hired before August 16, 2012 and after July 3, 1995 may continue the plan	Employees hired before January 1, 2013 and after August 16, 2012 may continue the plan	All APCD employees hired on or after January 1, 2013
Hire date				
Benefit formula	2% @ 55	2% @ 55	1.67% @ 57.5	2% @ 62
Benefit vesting schedule	5 years of service	5 years of service	5 years of service	5 years of service
Benefit payments	monthly for life	monthly for life	monthly for life	monthly for life
Retirement age	50-65	50-65	50-65	52-67
Monthly benefits, as a % of eligible	0.7454 - 1.5668	0.7454 - 1.5668	0.7091 - 1.4593	0.0100 - 0.0250
Required employee contribution rates	3.44 - 6.39%	6.89 - 12.77%	2.36 - 5.04%	7.41%
Required employer contribution rates	51.24%	50.49%	36.02%	42.91%

E. Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

At June 30, 2020, the District reported a liability of \$11,860,437 for its proportionate share of the net pension liability. The net pension liability was measured as of June 30, 2019, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2018 rolled forward to June 30, 2019 using standard update procedures. The District's proportion of the net pension liability was based on a projection of the District's long-term share of contributions to the pension plan relative to the projected contributions of all Pension Plan participants, actuarially determined. For the year ended June 30, 2020, the District's proportion, measured as of June 30, 2019, was 1.3901%, which was an increase of 0.1677% from its prior year proportion of 1.2224%, measured as of June 30, 2018.

XI. RETIREMENT PLAN - Continued

E. Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions – Continued

For the year ended June 30, 2020, the District recognized pension expense of \$2,446,315. Pension expense represents the change in the net pension liability during the measurement period, adjusted for actual contributions and the deferred recognition of changes in investment gain/loss, actuarial gain/loss, actuarial assumptions or method, and plan benefits.

Deferred outflows of resources and deferred inflows of resources above represent the unamortized portion of changes to net pension liability to be recognized in future periods in a systematic and rational manner. \$1,562,662 reported as deferred outflows of resources related to pensions resulting from District contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended June 30, 2021.

At June 30, 2020 the District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between actual and expected experience	\$ -	\$ (410,129)
Net difference between projected and actual earnings on retirement plan investments	-	(449,463)
Net change in proportion	1,241,593	(324,271)
Net change in assumptions	1,200,146	(248,039)
Net change in experience	261,305	
Changes in employer's proportion and differences between APCD contributions and proportionate share of contributions	-	(778,023)
APCD contributions subsequent to the measurement date	1,562,662	-
	<u>\$ 4,265,706</u>	<u>\$ (2,209,925)</u>

Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Year Ending June 30,	Amount
2021	\$ 462,278
2022	7,977
2023	(169,586)
2024	192,450
	<u>\$ 493,119</u>

XI. RETIREMENT PLAN – Continued

F. Actuarial Assumptions for Annual Pension Costs

	Miscellaneous
Valuation Date	June 30, 2018
Measurement Date	June 30, 2019
Actual Cost Method	Entry Age
Actuarial Assumptions	
Administrative expenses	Base of \$5.5 million for the fiscal year ending June 30, 2019 with 3.00% wage inflation increases annually.
Discount rate	7.00%
Inflation	3.00% wage inflation component
COLA Increases:	
Basic COLA	
Post-Retirement COLA	2.75% for those with a 2.75% cap; 2.60% for APCD Plans 1 and 2; 1.90% for General Plan 7 and APCD Plan 8 (PEPRA) (2)
Projected Salary Increase	3.00% plus merit component
Investment Rate of Return	7.00% (1)
Post-Retirement Mortality	Healthy Lives: Sex distinct 2014 CalPERS Healthy Annuitant Mortality table, adjusted by 0.95 for males and 0.90 for females, with generational improvements using Projection Scale MP-2016 from a base year of 2009; Disabled Lives: CalPERS Industrial Disabled Annuitant Mortality, no adjustment, and CalPERS Non-Industrial Disabled Annuitant Mortality (no adjustment - general only), projected with generational improvements using Projection Scale MP-2016 from a base year of 2009.

(1) Net of pension plan investment expense

(2) For General Plan 8 (PEPRA), benefits are assumed to increase at the rate of 1.90% per year if their employer had implemented General Plan 7 prior to January 1, 2013. Otherwise, benefits are assumed to increase at the rate of 2.60% per year.

The actuarial assumptions used in the June 30, 2019 valuation were based on the results of an actuarial experience study for the period July 1, 2013 through June 30, 2016. Based upon the results of the 2016 actuarial experience study, there was a decrease in discount rate, decreases in COLA and wage inflation assumptions, and revised mortality assumptions were utilized to more closely reflect actual experience. Deferred inflows of resources for changes of assumptions represents the unamortized portion of the changes of assumptions related to prior measurement periods.

G. Discount Rate

The long-term expected rate of return on pension plan investments (7.0 percent) was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class.

XI. RETIREMENT PLAN – Continued

G. Discount Rate - Continued

These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

The target allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return
Broad U.S. equity	19%	4.30%
Developed market non-U.S. equity	11%	5.75%
Emerging markets equity	7%	8.25%
Core fixed income	17%	1.25%
Custom non-core fixed income	11%	3.50%
Custom real return	15%	3.90%
Custom real estate	10%	4.30%
Private equity	10%	7.00%
Cash	0%	-0.25%
Total	100%	

The discount rate used to measure the total pension liability was 7.0 percent. The projection of cash flows used to determine the discount rate assumed that employee contributions will be made at the current contribution rate and that contributions from the District will be made at contractually required rates, actuarially determined. Based on those assumptions, the pension fund's fiduciary net position was projected to be available to make all projected future benefit payments of current active and inactive employees. In theory, the discount rate may differ from the long-term expected rate of return discussed previously. However, based on the projected availability of the pension fund's fiduciary net position, the discount rate is equal to the long-term expected rate of return on pension plan investments, and was applied to all periods of projected benefit payments to determine the total pension liability.

H. Sensitivity of the District's Proportionate Share of the Net Pension Liability to Changes in Discount Rate

The following presents the District's proportionate share of the net pension liability calculated using the discount rate of 7 percent, as well as what the District's proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1-percentage point lower (6 percent) or 1-percentage point higher (8 percent) than the current rate:

	1% Decrease 6.00%	Discount Rate 7.00%	1% Increase 8.00%
APCD's proportionate share of the net pension plan liability	\$ (19,849,923)	\$ (11,860,437)	\$ (5,336,834)

XI. RETIREMENT PLAN – Continued

I. Pension fund fiduciary net position

Detailed information about the pension fund's fiduciary net position is available in the separately issued SBCERS CAFR.

XII. OTHER POSTEMPLOYMENT BENEFITS (OPEB)

A. Plan Description

The District's cost sharing multiple-employer defined benefit post-employment healthcare plan (OPEB Plan) is administered by the Santa Barbara County Employees' Retirement System (Retirement System). The OPEB Plan provides medical benefits to eligible retired District and other employer plan sponsors' employees, as well as to their eligible dependents, pursuant to California Government Code Section 31694 et. seq. Other employer plan sponsors include the County of Santa Barbara (County), the Carpinteria-Summerland Fire Protection District, Goleta Cemetery District, Santa Maria Cemetery District, Carpinteria Cemetery District, Summerland Sanitary District, Santa Barbara County Association of Governments, and the Santa Barbara County Superior Court.

B. Benefits Provided

The County negotiates health care contracts with providers for both its active employees and the participating retired members of the Retirement System. District retirees are offered the same health plans as active County employees, as well as enhanced senior plans for retirees on Medicare. Retiree premiums are rated separately from active County employees; as such, the District does not have a retiree premium implicit rate subsidy.

Pursuant to the OPEB Plan, the District Board has determined to provide a monthly insurance premium subsidy of \$15 (whole dollars) per year of credited service from the 401(h) account for Eligible Retired Participants participating in a County-sponsored health insurance plan. The monthly insurance premium subsidy is applied directly by the Retirement System to pay the premium and is not paid to the retiree or other party. The maximum amount paid in any month does not exceed the premium; any amount in excess of the premium is forfeited. If an Eligible Retired Participant does not participate in the County-sponsored health insurance plan, then the Retirement System reimburses the eligible Retired Participant for other medical care expenses. The maximum monthly amount paid is \$4 (whole dollars) per year of credited service.

XII. OTHER POSTEMPLOYMENT BENEFITS (OPEB) - Continued

B. Benefits Provided - Continued

If a member is eligible for a disability retirement benefit, the member can receive a monthly health plan subsidy of \$187 (whole dollars) per month or a subsidy of \$15 (whole dollars) per month per year of service, whichever is greater. This subsidy is treated as a nontaxable amount to the disabled recipient. Survivors of Eligible Retired Participants (Spouses and Dependents) continue to receive a subsidy proportionate to their percentage of the retiree's pension benefit.

C. Employees Covered

As of the June 30, 2019 actuarial valuation, the following current and former employees were covered by the benefit terms under the OPEB Plan:

Active employees	28
Vested terminated employees	13
Retirees and surviving spouses	<u>61</u>
Total	<u><u>102</u></u>

D. Funding Policy

Participating employer plan sponsors individually determine their separate contributions to the Retirement System to fund the OPEB Plan. The District has adopted a policy of funding at an amount not to exceed 25% of its normal retirement costs in any given fiscal year, in order to pre-fund the benefit at the maximum amount allowed under the IRC.

E. Net OPEB Asset

The actuarial assumptions used in the valuation were based on 1) the demographic assumptions determined in the actuarial experience study of July 1, 2013 – June 30, 2016 for the Pension Plan, 2) implementation of the OPEB Funding Policy, and 3) current experience for OPEB Plan election by retirees. As the benefit for the OPEB plan is a fixed payment per year of service that is currently lower than the premiums paid for coverage, and is expected to remain so into the future, no age related costs are required to be developed.

The District's net OPEB asset was measured as of June 30, 2019 and the total OPEB liability used to calculate the net OPEB asset was determined by an actuarial valuation dated June 30, 2018, updated to June 30, 2019, based on the following actuarial methods and assumptions:

XII. OTHER POSTEMPLOYMENT BENEFITS (OPEB) - Continued

E. Net OPEB Asset – Continued

Salary increase rate	3% plus an additional longevity and promotion increase compounded based on years of service
Investment rate of return	7.00%, net of investment expense
Healthcare cost trend rates	The Healthcare Cost Trend Rate is not applicable because the total cost of health benefits is not valued. Only the monthly benefit provided is valued using the assumption that no future increase will be granted to the amount.
Future retiree plan election	55% - monthly subsidy of \$15 per year of service; 45% - \$4 cash benefit option
Mortality rates	<p>Healthy Lives: Mortality rates for retirees, beneficiaries, terminated vested, and reciprocals are based on the sex distinct CalPERS Healthy Annuitant Mortality Tables adjusted by 0.95 for males and 0.90 for females, with Generational improvement using Projection Scale MP-2016 from a base year of 2009. Non-duty related mortality rates for active members are based on the sex distinct CalPERS Preretirement Non-Industrial Mortality Table, with no adjustment, with Generational improvement using Projection Scale MP-2016 from a base year of 2009. Safety members are also subject to the CalPERS Preretirement Industrial Mortality Table for duty-related deaths, with the same Generational improvements applied.</p> <p>Disabled Lives: Mortality rates for disabled retirees are based on CalPERS Industrial Disabled Annuitant Mortality, with no adjustment (Safety only), CalPERS Non-Industrial Disabled Annuitant Mortality, with no adjustment (General only), with Generational improvement using Projection Scale MP-2016 from a base year of 2009.</p>

The OPEB assets are invested in the same commingled vehicles as the pension plan, but with a more simple asset allocation. It is expected that as the OPEB assets continue to grow, the asset allocation will shift to be more like that of the pension plan. Therefore, in the long run, we expect the OPEB plan to realize the same long-term rate of return as the pension plan. The long-term expected rate of return, measured as of June 30, 2019, on pension plan investments (7.0%) was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target allocation and best estimates of real rates of return for each major asset class are summarized below:

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return
Domestic equity	60%	4.10%
Fixed income	40%	0.04%
Total	100%	

F. Discount Rate

The discount rate used to measure the total OPEB liability was 7.00 percent. The projection of cash flows used to determine the discount rate assumed that the District contributions will be made at rates equal to the actuarially determined contribution rates. Based on those assumptions, the OPEB plan's fiduciary net position was projected to be available to make all projected OPEB payments for current active and inactive employees and beneficiaries. Therefore, the long-term expected rate of return on OPEB plan investments was applied to all periods of projected benefit payments to determine the total OPEB liability.

XII. OTHER POSTEMPLOYMENT BENEFITS (OPEB) – Continued

G. Changes in the OPEB Asset

The changes in the net OPEB asset for the OPEB Plan are as follows:

	(Increase) Decrease		
	Total OPEB Liability (a)	Plan Fiduciary Net Position (b)	Net OPEB Asset (c) = (b) + (a)
Balance at June 30, 2019 (Valuation Date June 30, 2018)	\$ (1,492,600)	\$ 1,536,426	\$ 43,826
Changes for the year:			
Service cost	(12,164)		(12,164)
Interest	(101,315)		(101,315)
Differences between expected and actual experience	(153,752)		(153,752)
Contributions - employer		202,521	202,521
Net investment income		152,445	152,445
Benefit Payments	104,211	(104,211)	
Administrative expenses		(6,630)	(6,630)
Net changes	(163,020)	244,125	81,105
Balance at June 30, 2020 (Valuation Date June 30, 2019)	\$ (1,655,620)	\$ 1,780,551	\$ 124,931

H. Sensitivity of the Net OPEB Asset to Changes in the Discount Rate

The following presents the net OPEB asset (liability) of the District if it were calculated using a discount rate that is one percentage point lower or one percentage point higher than the current rate, for measurement period ended June 30, 2019:

1% Decrease 6.00%	Current Discount Rate 7.00%	1% Increase 8.00%
\$ (53,785)	\$ 124,931	\$ 275,558

I. Sensitivity of the Net OPEB Asset to Changes in the Health Care Cost Trend Rates

Since the dollar amount of the benefits provided are not expected to increase and are below the current premiums for health benefits, no trend assumptions are used in calculating the OPEB assets (liabilities). Therefore, the results are not affected by any increase or decrease in the healthcare trend rates that may apply to the underlying benefit premiums in the future, for measurement period ended June 30, 2019.

J. OPEB Plan Fiduciary Net Position

Detailed information about the OPEB plan's fiduciary net position is available in the separately issued SBCERS financial report.

XII. OTHER POSTEMPLOYMENT BENEFITS (OPEB) – Continued

K. Recognition of Deferred Outflows and Deferred Inflows of Resources

Gains and losses related to changes in total OPEB liability and fiduciary net position are recognized in OPEB expense systematically over time.

Amounts are first recognized in OPEB expense for the year the gain or loss occurs. The remaining amounts are categorized as deferred outflows and deferred inflows of resources related to OPEB and are to be recognized in future OPEB expense.

The recognition period differs depending on the source of the gain or loss. The difference between projected OPEB plan investment earnings and actual earnings is amortized over a five year period. The remaining gains and losses are amortized over the expected average remaining service life.

L. OPEB Expenses and Deferred Outflows/Inflows of Resources Related to OPEB

For the fiscal year ended June 30, 2020, the District recognized OPEB expense of \$71,190.

As of the fiscal year ended June 30, 2020, the District reported deferred outflows of resources and deferred inflows of resources related to OPEB from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Net difference between projected and actual earnings on retirement plan investments	\$ -	\$ (54,067)
Differences between actual and expected experience	76,876	-
APCD contributions subsequent to the measurement date	200,428	-
	<u>\$ 277,304</u>	<u>\$ (54,067)</u>

The \$200,428 reported as deferred outflows of resources related to contributions subsequent to the June 30, 2019 measurement date will be recognized as an increase of the net OPEB asset during the fiscal year ending June 30, 2021. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to OPEB will be recognized as expense as follows:

<u>Year Ending June 30,</u>	<u>Amount</u>
2020	\$ 60,935
2021	(15,942)
2022	(13,835)
2023	(8,349)
	<u>\$ 22,809</u>

XIII. DEFERRED COMPENSATION PLANS

A. Employee Contribution Deferred Compensation Plan

The District offers to its employees an optional deferred compensation plan created in accordance with Section 457 of the Internal Revenue Code (IRC). This plan is available to substantially all employees and allows participants to defer a portion of their current income until future years up to a maximum of \$19,500 (during calendar year 2020), so as to shelter such funds and earnings from state and federal taxation until withdrawal. The deferred compensation is not available to participants until termination, retirement, death, or unforeseeable emergency.

This plan is administered through a third-party administrator. The District does not perform the investing function, and has no fiduciary accountability for the plan. Thus, the plan assets and any related liability to plan participants have been excluded from these financial statements.

B. Social Security Compliance Deferred Compensation Plan

The District's Social Security Compliance Deferred Compensation Plan is a supplemental retirement program utilized by the District in lieu of payments to Social Security (FICA), governed under Internal Revenue Code Sections 3121 and 457. Enrollment in this plan is mandatory for contract, extra-help, seasonal and temporary employees. Employees enrolled in the regular retirement system are not eligible for this plan. Based upon the employee's gross compensation, the employee's deferral, on a before-tax basis, equals 6.2% and the District's contribution equals 1.5% for a combined total of 7.7%.

This plan is administered through a third-party administrator. The District does not perform the investing function, and has no fiduciary accountability for the plan. Thus, the plan assets and any related liability to plan participants have been excluded from these financial statements.

The District's actual contributions for the current year and two preceding years are as follows:

<u>Fiscal Year Ended</u>	<u>Contributed</u>
6/30/2018	\$ 4,219
6/30/2019	\$ 5,935
6/30/2020	\$ 5,446

XIV. SUBSEQUENT EVENTS

Subsequent events have been evaluated through January 8, 2021, the date that the financial statements were available to be issued.

On September 15, 2020, the District entered into the First Amendment to the Lease Agreement with the County of Santa Barbara governing the Casa Nueva property.

XIV. SUBSEQUENT EVENTS - Continued

The terms of the amendment included a 15% reduction in square footage rented by the District, in addition to a reduction in rent from \$18,279 monthly to \$12,774 with annual increases of 3% expected. This amendment also includes an option to extend the lease term an additional seven years.

XV. DISTRICT OWNED EMISSION REDUCTION CREDITS (ERCs)

On April 14, 2009, the United States Air Force (USAF) transferred ERC Certificate No. 0091-1108 to the District containing 12.000 tons per year (tpy) of oxides of nitrogen (NOx). This was done as part of the Environmental Investment (ENVVEST) Program and the requirements of District Regulation XIII.

On January 8, 2019, the Point Arguello Pipeline Company (PAPCO) transferred ERC Certificate No. 0040-0805 to the District containing 7.086 tons per year (tpy) of reactive organic compounds (ROCs). This was done pursuant to Section IV, Paragraph B.2(e) of the May 20, 1997 Third Amendment to the OCS Mitigation Agreement entered into between Chevron (on behalf of PAPCO) and the District, which required that all rights to ERCs generated from the shutdown of the Gaviota Oil and Gas Plant be conveyed to the District.

The Santa Barbara County market for ERCs would indicate a potential fair value of \$1,880,000 for these credits. Given that it is impossible to predict when and if the credits might be sold, and at what price, management believes it would be misleading to record them in the financial statements at any value at this time.

Management, however, would like financial statement readers to be aware that the District is in possession of these credits and that they may be sold at some point in the future.

REQUIRED SUPPLEMENTARY INFORMATION (UNAUDITED)

GENERAL FUND - BUDGETARY COMPARISON SCHEDULE

For the Fiscal Year Ended June 30, 2020 (Budgetary Basis)

	Budgeted Amounts		Actual Amounts	Variance with
	Original	Final	Budgetary Basis	Final Budget - Positive (Negative)
Revenues:				
Licenses, permits, and franchises	\$ 3,034,906	3,034,906	\$ 3,684,557	\$ 649,651

See accompanying independent auditors' report.

See accompanying notes to the General Fund – Budgetary Comparison Schedule.

NOTES TO THE GENERAL FUND - BUDGETARY COMPARISON SCHEDULE

(Budgetary Basis) As of June 30, 2020

I. BASIS OF PRESENTATION

Budgets are prepared on the modified accrual basis of accounting consistent with GAAP.

II. BUDGETARY AND LEGAL COMPLIANCE

In accordance with the California Health and Safety Code Section 40130-40131 and other statutory provisions, on or before July 1 for each fiscal year, the District must prepare and submit a budget to the County Auditor-Controller. Budgets are prepared on the modified accrual basis of accounting consistent with generally accepted accounting principles (GAAP).

Annually, the Board of Directors conducts two public hearings for the discussion of a proposed budget. At the conclusion of the hearings, the Board adopts the final budget. All appropriations lapse at fiscal year-end and are subject to re-appropriation as part of the following year's budget. The legal level of budgetary control (the level on which expenditures may not legally exceed appropriations) is maintained at the object level. The Air Pollution Control Officer (APCO) is delegated authority to make changes to the annual budget, provided it is within and between the salaries and benefits, services and supplies, other expenses, and capital outlay object levels. Subsequent to budget adoption, increases or decreases to reserves and designations must be adopted by a 4/5 vote of the Board. Lastly, the County Auditor-Controller is authorized to make administrative budget adjustments for the fair market value of assets held in the County Treasury.

Variances with Final Budgeted Amounts

There were no variances out of budgetary or legal compliance.

Please see the General Fund Budgetary Highlights section of the MD&A, beginning on page 29, for more details on the object level variances found in the budgetary comparison schedule.

SANTA BARBARA COUNTY EMPLOYEES' RETIREMENT SYSTEM – SCHEDULE OF THE DISTRICT'S PROPORTIONATE SHARE OF THE NET PENSION LIABILITY

KEY AIR QUALITY AND DEMOGRAPHIC INFORMATION

Santa Barbara County Region

The Santa Barbara County Air Pollution Control District includes all of Santa Barbara County.

Geography

Santa Barbara County, located approximately 100 miles northwest of Los Angeles and 300 miles south of San Francisco, was established by an act of the State Legislature on February 18, 1850. The County occupies 2,774 square miles, one-third of which is located in the Los Padres National Forest. Bordered on the West and South by the Pacific Ocean, the County has 110 miles of beaches, a little over half being south facing beaches. Agriculture figures prominently in the valleys with just over 700,000 acres devoted to crops and pasture. Strawberries, broccoli, grapes (wine), and avocados are the four most notable crops of the County.

The County has 4 main urban areas:

Santa Barbara Coast

Santa Barbara Coast is located in the southern portion of the County. The area is bordered in the south by the Pacific Ocean and in the north by the Santa Ynez Mountain range, one of the few mountain systems in North America that run east-west rather than north-south. Because of the unique south-facing aspect, and its year round mild Mediterranean climate, it is fitting that Santa Barbara has been described by many as the “California Riviera.”

Santa Ynez Valley

Santa Ynez Valley is located in the central portion of the County, nestled between the Santa Ynez and San Rafael mountain ranges. Santa Ynez Valley includes the communities of Buellton, Solvang, and Santa Ynez, as well as the Chumash Reservation. Lake Cachuma is also nestled between the mountain ranges, offering recreational activities and a water supply to the County. The Valley’s climate has recently attracted many wine makers to the area, adding vast vineyards to the rolling hills that lead to the Los Padres National Forest.

Santa Maria Valley

Santa Maria Valley is located in the northern portion of the County, bordered by San Luis Obispo County on the north. Much of the new development within the County has been happening in the Santa Maria Valley area. The area has experienced a lot of change in the past decade.

Lompoc Valley

Lompoc Valley is located in the western portion of the County. Vandenberg Air Force Base is located in the Valley contributing many local employment opportunities to County residents.

Overall, the County is a popular tourist and recreational area, famous for its mild climate (at 64 degrees F and with 300 days of sunshine on average), picturesque coastline, scenic mountains, 114 parks, 18 beaches, and 17 golf courses. The County is rich in heritage and cultural diversity; Spanish-Mediterranean architecture on the South Coast, western style towns inland, missions, Danish village of Solvang, and numerous cultural festivals and parades, all reflect its diverse legacy. World-class music, opera, dance, theatre and visual arts, coupled with beautiful urban and rural communities, make the County a haven to those who live here, as well as a delight to those who visit from all over the world.

The following charts illustrate air quality, demographic, employment and motor vehicle information about the Santa Barbara County Air Pollution Control District region.
