SBCAPCD FAILURE REPORT FOR GDF TESTING

This report must be used by facilities that have failed a required Gasoline Dispensing Facility (GDF) test [e.g., Static Leak Decay (TP201.3) or Air to Liquid Ratio (TP-201.5)] to document the cause and corrective action(s) taken. For <u>each failure</u>, a detailed explanation must be provided for the cause of the failure <u>and</u> the action taken to correct that problem.

Please identify the exact failed components by name and location. Be sure to cross reference this information with the test results recorded on APCD forms ENF-19, ENF-79 or ENF-85 by including information such as date, time and the pump or nozzle number.
